how far you can go before you become the very monster you're fighting in the wake of the renewed interest in the philosophy of immanuel kant the neo kantian theories of heinrich rickert 1863 1936 are increasingly drawing attention this monograph is an attempt to rescue rickert from an undeserved oblivion by an analysis of his systematic philosophy of values the author discusses rickert's epistemology and ontology which lay the foundation for a methodology of the natural sciences and the humanities in rickert's view these types of science are not in opposition to each other but operate on a continuum between two extremes a generalizing natural scientific and an individualizing cultural scientific approach to reality the social sciences in particular operate on this continuum in a flexible manner sometimes close to the natural scientific pole as in the case of experimental psychology or econometrics

sometimes close to the cultural scientific approach as in the case of cultural sociology or cultural history thus there is in rickert's logic of science no room for any methodological quarrel. *Real Unreal Cosmos* is a non-fiction physics cosmology related book in which we talk about the simulation hypothesis i.e. in simple words have you ever wondered who where is god our almighty creator that we pray and seek is everything that happens with us our victories losses luck already preplanned the universe in which we live eat feel love lose achieve overall exist itself only doesn't seem to be real or authentic reality whatever we feel or see is just the image that our brain manifests for us to see hence the overall universe we call reality is nothing other than a mere simulation or a fake world to be precise we as humans have developed so far in technology that we created so much in this world but what if we're not creators but creations just like simple another character in a video game so who is the creator *Real Unreal Cosmos* doesn't only just places myths behind facts like mere fantasies or probabilities but provides substantial evidence for why our universe our cosmos our reality our existence is not real each chapter in the book provides an evidence or a reason to believe that reality is unreal and that's what is real *Real Unreal Cosmos* for you about the author saurabh gupta is a mumbai based indian 21 years old cosmology physics enthusiast with a bachelors in information technology he has a love for gaming and it was while a gaming session which brought upon the whole idea of this book it took almost 3.5 years of research to complete his book he is also an aspiring application developer he always had a craving curiosity to learn understand and manifest the universe since childhood due to his everlasting love for space and craving curiosity for the mysteries of the universe he began researching in cosmology and theoretical physics as early as when he was in 5th grade he started to study the universe deeply and when he was in 5th grade his love and interest in space rose at an exponential extent what happened was he usually kept records of the several satellites and spacecraft and kept on tracking them and on a particular night he witnessed and observed the iss international space station revolving around the earth through the sky and that was the moment which gave that chills of his and the existence of the universe around him the idea that reality is subjective constructed from our own perceptions is an ancient concept we are to understand reality in terms of what is possible has methodological implications which a contemplative philosophy makes explicit the goal is no longer to determine how things are or must be but rather to provide an overview of how they could be and the diversity with which they already appear the function of philosophy is not the discovery of a single answer but rather a careful description of the diversity and the heterogeneity of possible answers in different contexts and practices this approach inspired by wittgenstein was applied to the philosophy of religion by dewi z phillips 1934 2006 in particular this volume explores his contemplative philosophy of religion in an intense and lively discussion showing how the description of religious faith and the access to its practice and language change unexpectedly and provocatively in this way of thinking
