ambient intelligence began as a vision for the future of technology
and has now become a reality the widespread use of modern technology
has quickly expanded into the use of our everyday lives on a daily
basis we are instantly connected to people places ideas and
information which have led to the acceleration of knowledge as the
continuing development of new technologies becomes available those
technologies will play an integral role in the future pervasive and
ubiquitous technology innovations for ambient intelligence
environments is a collection of research on the subject matter of
human computer interaction ubiquitous computing embedded systems and
other areas of study which contribute to ambient intelligence this
comprehensive reference aims to broaden the overall knowledge on
ambient intelligence as it relates to the aspects of modern life

human computer interaction hci is easy to define yet difficult to
predict encompassing the management study planning and design of the
ways in which users interact with computers this field has evolved
from using punch cards to force touch in a matter of decades what was
once considered science fiction is now ubiquitous the future of hci is
mercurial yet predictions point to the effortless use of high
functioning services the handbook of research on human computer
interfaces developments and applications is primarily concerned with
emerging research regarding gesture interaction augmented reality and
assistive technologies and their place within hci from gaming to
rehabilitation systems these new technologies share the need to

interface with humans and as computers become thoroughly integrated into everyday life so does the necessity of hci research this handbook of research benefits the research needs of programmers developers students and educators in computer science and researchers
