Nov 08 2022

for the first time a phenomenon astronomers have long hoped to directly image has been captured by nasa s james webb space telescope s near infrared camera nircam in this stunning image of the serpens nebula the discovery lies in the northern area seen at the upper left of this young nearby star forming region

## **good news we can now discuss the covid lab leak theory**

Oct 07 2022

committee chair gary peters gave credence to both the natural origin theory and the lab leak theory noting given the likelihood that the chinese government may never fully disclose all the information they have about the initial covid 19 outbreak we want to use the scientific information available to better prepare for future potential
