this is the first major study in chinese business history based largely on business s own records it focuses on the battle for the cigarette market in early twentieth century china between the british american tobacco company based in new york and london and its leading chinese rival nanyang brothers tobacco company whose headquarters were in hong kong and shanghai from its founding in 1902 the british american tobacco company maintained a lucrative monopoly of the market until 1915 when nanyang entered china and extended tis operations into the country s major markets despite the use of aggressive tactics against it both companies grew rapidly during the 1920s and competition between them reached its peak but by 1930 nanyang weakened bringing an end to serious commercial rivalry though less competitive both companies continued to trade in china until their sino foreign rivalry ended altogether with the founding of the people s republic in 1949 debate over international commercial rivalries has often been conducted broadly in terms of imperialist exploitation and economic nationalism this study shows the usefulness and limitations of these terms for historical purposes and contributes to the separate but related debate over the significance of entrepreneurial innovation in chinese economic history by analyzing the foreign chinese companies business practices and by describing their involvement in diplomatic incidents boycotts strikes student protests relations with peasant tobacco growers dealings with the kuomintang and chinese communist party and a host of other activities the author brings to light the roles that big businesses played not only in china s economy but also in its politics society and foreign affairs

philip ii of spain ruler of the most extensive empire the world had ever known has been viewed in a harsh and negative light since his death in 1598 identified with repression bigotry and fanaticism by his enemies he has been judged more by the political events of his reign than by his person this book published four hundred years after philip s death is the first full scale biography of the king placing him within the social cultural religious and regional context of his times it presents a startling new picture of his character and reign drawing on philip s unpublished correspondence and on many other archival sources henry kamen reveals much about philip the youth the man the husband the father the frequently troubled christian and the king kamen finds that philip was a cosmopolitan prince whose extensive experience of northern europe broadened his cultural imagination and tastes whose staunchly conservative ideas were far from being illiberal and fanatical whose religious attitudes led him to accept a practical coexistence with protestants and jews and whose support for las casas and other defenders of the indians in america helped determine government policy shedding completely new light on most aspects of philip s private life and in consequence on his public actions the book is the definitive portrayal of philip ii
