Spiritual and Demonic Magic 2000 first published by the warburg institute in 1958 this book is considered a landmark in renaissance studies whereas most scholars had tended to view magic as a marginal subject walker showed that magic was one of the most typical creations of the late fifteenth and sixteenth centuries walker takes readers through the magical concerns of some of the greatest thinkers of the renaissance from marsilio ficino giovanni pico della mirandola and jacques lefevre d etaples to jean bodin francis bacon and tommaso campanella ultimately he demonstrates that magic was interconnected with religion music and medicine all of which were central to the renaissance notion of spiritus remarkable for its clarity of writing this book is still considered essential reading for students seeking to understand the assumptions beliefs and convictions that informed the thinking of the renaissance this edition features a new introduction by brian copenhaver one of our leading experts on the place of magic in intellectual history

The Mysteries of Magic 1897 magic in the ancient eastern mediterranean cognitive historical and material perspectives brings together articles with the shared conviction that the category of magic remains useful in religious studies and provides new insights to biblical and related texts and artifacts historically magic has been considered in both scholarly and popular discourse to be questionable obscure and potentially subversive 19th century scholars of religion viewed magical beliefs and practices as primitive and inferior compared to judeo christian forms of worship which were considered true religion more recently the category has been defended especially by scholars of the cognitive science of religion who find it useful for delineating a set of beliefs and practices fundamental to all forms of religion the volume joins current scholarship in refraining from using the concept as an othering device and in arguing that it can still serve as a helpful analytical tool in addition to analyzing the discourse on magic in both ancient literature and modern scholarship the articles provide individual examples of how literary and material culture attest to the existence of magical beliefs and practices in sources from the ancient near east to the byzantine period the book is divided into three parts the contributions in the first part approach magic from the theoretical perspective of cognitive studies ritual studies and cultural evolution while the rest of the book focuses on how magic and magicians are understood in ancient sources the second part discusses a specific set of textual material dealing with blessings and curses the third part of the volume discusses the world of various destructive celestial beings from which one and one s loved ones had to be defended as well as the multitude of protective beings such as angels

Guitar Fretboard Facts 2004 in this work jan n bremmer aims to bring together the worlds of early christianity and those of ancient history and classical literature worlds that still all too rarely interlock contextualising the life and literature of the early christians in their greco roman environment he focusses on four areas a first section looks at more general aspects of early christianity the name of the christians their religious and social capital prophecy and the place of widows and upper class women in the christian movement second the chronology and place of composition of the early apocryphal acts of the apostles and pseudo clementines are newly determined by paying close attention to their doctrinal contents but also innovatively to their onomastics and social vocabulary the author also analyses the frequent use of magic in the acts and explains the prominence of women by comparing the acts to the greek novel third an investigation into the theme of the tours of hell suggests a new chronological order shows that the christian tours were indebted to both greek and jewish models and illustrates that in the course of time the genre dropped a large part of its jewish heritage the fourth and final section concentrates on the most famous and intriguing report of an ancient martyrdom the passion of perpetua it pays special attention to the motivation and visions of

perpetua which are analyzed not by taking recourse to modern theories such as psychoanalysis but by looking to the world in which perpetua lived both christian and pagan it is only by seeing the early christians in their ancient world that we might begin to understand them and their emerging communities publisher s description

Florida Administrative Weekly 2001 this book traces the theme of justice throughout the narrative of exodus in order to explicate how yhwh s reclamation of israel for service worship reveals a distinct theological ethic of justice grounded in yhwh s character and israel s calling within yhwh s creational agenda adopting a synchronic text immanent interpretive strategy that focuses on canonical and

inner biblical connections nathan bills identifies two overlapping motifs that illuminate the theme of justice in exodus first bills considers the importance of israel s creation traditions for grounding exodus s theology of justice reading exodus against the backdrop of creation theology and as a continuation of the plot of genesis bills shows that the ethical disposition of justice imprinted on israel in exodus is an application of yhwh s creational agenda of justice second bills identifies an educational agenda woven throughout the text the narrative gives heightened attention to the way yhwh catechizes israel in what it means to be the particular beneficiary and creational emissary of yhwh s justice these interpretative lenses of creation theology and pedagogy help to explain why israel s salvation and shaping embody a programmatic applicability of yhwh s justice for the wider world this volume will be of substantial interest to divinity students and religious professionals interested in the themes of exodus exile and return
