A Series of Eleven Lessons in Karma Yoga 1928

1984 new york city through a series of bad life decisions a former big time mobster has been reduced to a low level hood and he has to find a way to repay the family 100 000 in a week or else face the consequences this sets off a chain reaction of ever increasingly absurd and comic events that culminate in one of the largest heists in mob history

Lessons in Psychology 1891

Psychology is the study of the mind and behavior. It is a branch of science that seeks to understand the processes of the mind and how they influence behavior. The study of psychology has a long history, dating back to ancient times. However, it was not until the late 19th and early 20th centuries that psychology became a formal scientific discipline. The field of psychology has since expanded to include a wide range of sub-disciplines, including clinical psychology, cognitive psychology, developmental psychology, and social psychology. The study of psychology is essential for understanding human behavior and for developing effective interventions for mental health problems.

Lessons in Leadership and Life 2002

this unique book represents another concerted research effort concerning chinese mathematics education with contributions from the world's leading scholars and most active researchers the book presents the latest original research work with a particular focus on the teaching side of chinese mathematics education to a wide international audience there are mainly three sections in the book the first section introduces readers to a historical and contemporary perspective respectively on traditional mathematical teaching in ancient china and on how modern chinese mathematics teachers teach and pursue their pre service training and in service professional development the second section presents studies investigating a wide range of issues at both the macro and micro levels on how chinese mathematics teachers teach mathematics the third section focuses on chinese mathematics teachers investigating issues about their knowledge belief teacher training and professional development like its predecessor how chinese learn mathematics perspectives from
