discover the power of location data to build effective intelligent data models with geospatial ecosystems key featuresmanipulate location based data and create intelligent geospatial data modelsbuild effective location recommendation systems used by popular companies such as ubera hands on guide to help you consume spatial data and parallelize gis operations effectivelybook description data scientists who have access to vast data streams are a bit myopic when it comes to intrinsic and extrinsic location based data and are missing out on the intelligence it can provide to their models this book demonstrates effective techniques for using the power of data science and geospatial intelligence to build effective intelligent data models that make use of location based data to give useful predictions and analyses this book begins with a quick overview of the fundamentals of location based data and how techniques such as exploratory data analysis can be

applied to it we then delve into spatial operations such as computing distances areas extents centroids buffer polygons intersecting geometries geocoding and more which adds additional context to location data moving ahead you will learn how to quickly build and deploy a geo fencing system using python lastly you will learn how to leverage geospatial analysis techniques in popular recommendation systems such as collaborative filtering and location based recommendations and more by the end of the book you will be a rockstar when it comes to performing geospatial analysis with ease what you will learnlearn how companies now use location dataset up your python environment and install python geospatial packagesvisualize spatial data as graphsextract geometry from spatial dataperform spatial regression from scratchbuild web applications which dynamically references geospatial datawho this book is for data scientists who would like to leverage location based data and want to use location based intelligence in their data models will find this book useful this book is also for gis developers who wish to incorporate data analysis in their projects knowledge of python programming and some basic understanding of data analysis are all you need to get the most out of this book
