One Flash! 2015-09-29 photographers are always looking for perfect light unfortunately the quality of available light and the situations in which photos are created are rarely perfect this is especially true when photographing weddings or portraits on location so while finding beautiful existing light is every photographer's ideal it isn't always possible this is the point at which photographers tend to reach for a portable on camera flash indeed these intense light sources can prove invaluable but only if you know how to use them effectively in the hands of an inexperienced photographer on camera flash will produce images that look flat and lifeless images with harsh shadows washed out skin tones cavernous black backgrounds and other

unappealing visual characteristics in this book acclaimed wedding and portrait photographer neil van niekerk shows you how to avoid the pitfalls photographers new to speedlights often encounter so that you can produce professional images using on camera flash you'll learn to use simple accessories to manipulate the quality of light from your flash and how to improve a lighting scenario by enhancing rather than overwhelming the existing light when the available light is too low and too uneven to be combined with flash he shows you how to override it completely with flash and with some thought and careful application of specialized techniques still get results that look great on camera flash is one of the most challenging light sources to master but with the techniques in this book you'll learn to use it with confidence for wedding and environmental portrait photographers who must work in ever changing lighting scenarios this can mean better images and better sales

Mastering Nikon Speedlights 2015-08-05 simon stafford has written a key technical guide to every feature on this high end semi pro model stafford is our top selling magic lantern author and technical editor of nikon user magazine so this guide is a must have for anyone investing in this highly complex model

On-Camera Flash 2015-10-19 photographers must adjust their aperture shutter speed and iso collectively exposure settings to produce an image that is not too light overexposed or too dark underexposed with a proper exposure there is a full range of tones from light to dark detail in the highlights and shadows and good image color exposure settings can also be used for creative effect using a fast shutter speed can freeze motion while using a slow shutter speed can produce an artistic blur a wide aperture large lens opening is used to limit the image area from front to back that appears sharp this can make the subject stand out a narrow aperture small opening is used to record everything the lens sees as tack sharp with judicious use of these controls and in some cases the introduction of flash to bring up the light levels photographers have the tools needed to craft powerful portraits and capture the majesty of nature

Magic Lantern Guides®: Nikon D700 2009-06-02 maximizing the power of your camera's flash is difficult enough in a studio set up but outdoors literally presents a whole new world of challenges john gerlach and barbara eddy have taken the most asked about subject from their renowned photography workshops and turned it into this guidebook that is sure to inspire your next outdoor shoot while also saving you time and frustration outdoor flash photography covers a range of practices from portrait to landscape including unique strategies that the authors have pioneered through 40 years in the field mastering the use of multiple flashes to freeze action is shown through one of most challenging subjects in nature hummingbirds in flight this book will benefit photographers of all experience levels who are eager to evolve their outdoor photography and get the most out of their equipment
