The Unknown History of Jewish Women Through the Ages

2023-05-22

the unknown history of jewish women on learning and illiteracy on slavery and liberty is a comprehensive study on the history of jewish women which discusses their absence from the jewish hebrew library of the people of the book and interprets their social condition in relation to their imposed ignorance and exclusion from public literacy the book begins with a chapter on communal education for jewish boys which was compulsory and free of charge for the first ten years in all traditional jewish communities the discussion continues with the striking absence of any communal jewish education for girls until the late nineteenth and early twentieth century and the implications of this fact for twentieth century immigration to israel 1949 1959 the following chapters discuss the social cultural and legal contexts of this reality of female illiteracy in the jewish community a community that placed a supreme value on male education the discussion focuses on the patriarchal order and the postulations rules norms sanctions and mythologies that in antiquity and the middle ages laid the religious foundations of this discriminatory reality

for a long time agriculture and rural life were dismissed by many contemporaries as irrelevant or old fashioned contrasted with cities as centers of intellectual debate and political decision making the countryside seemed to be becoming increasingly irrelevant today politicians in many european countries are starting to understand that the neglect of the countryside has created grave problems similarly historians are remembering that european history in the twentieth century was strongly influenced by problems connected to the production of food access to natural resources land rights and the political representation and activism of rural populations hence the handbook offers an overview of historical knowledge on a variety of topics related to the land it does so through a distinctly activity centric and genuinely european perspective rather than comparing different national approaches to living with the land the different chapters focus on particular activities from measuring to settling the land from producing and selling food to improving agronomic knowledge from organizing rural life to challenging political structures in the countryside furthermore the handbook overcomes the traditional division between east and west north and south by embracing a transregional approach that allows readers to gain an understanding of similarities and differences across national and ideological borders in twentieth century europe
