Science Fair Project Journal

2019-09-06

particularly in places of learning technology is all pervasive because everyone is always making copies copyright is center stage and copyright law when misapplied or misinterpreted affects not only the way that you teach but even what you teach with decades of experience interpreting the intricacies of copyright law as it pertains to librarianship russell is the ideal authority to address the concerns of librarians teachers and teaching librarians who work in the k 12 environment her book will encourage you to stop allowing your fear of copyright issues to limit how and what you share or teach and instead be more involved in shaping copyright law to better serve your learning community through scenario based discussions it covers key topics such as the reasons librarians and teachers have so many misconceptions about copyright and why understanding copyright is a process not a one time event recent legislative and policy developments that impact schools and libraries situations often encountered by

educators such as using copyrighted material in class assignments digital lesson plans bulletin board displays social media school plays and band performances and talent shows the use of licensed content in a variety of settings what constitutes fair use so that you can be empowered by knowing exactly what's possible within the law and guidance on making long term strategic decisions and developing copyright policies

IFRS for Small and Medium-Sized Enterprises

2008-08-07

this book examines the challenges posed to australian copyright law by streaming from the end user perspective it compares the australian position with the european union and united states to draw lessons from them regarding how they have dealt with streaming and copyright by critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights the rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement these prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming it is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part conversely the fair dealing defence in australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study when considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking end users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content this is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions

Medical Imaging and Radiotherapy Research E-Book

2010-07-15

what does it mean when consumers shop with a conscience and choose products labeled as fair or sustainable does this translate into meaningful changes in global production processes to what extent are voluntary standards implemented and enforced and can they really govern global industries looking behind the label presents an informative introduction to global production and ethical consumption tracing the links between consumers choices and the practices of multinational producers and

retailers case studies of several types of products wood and paper food apparel and footwear and electronics are used to reveal what lies behind voluntary rules and to critique predominant assumptions about ethical consumption as a form of political expression
