in 1972 following the huge success of *Run Silent, Run Deep* Edward L. Beach's second novel of submarine warfare was published to great acclaim like its predecessor *Dust on the Sea* was lauded for its authentic portrayal of what it meant to be a submariner during the desperate years of world war ii tense dramatic and rich in technical and tactical detail the book draws on beach's experience as a submariner in the us navy to describe the commander and crew of the fictitious uss eel as they battle overwhelming odds to destroy japanese ships and save american lives with no margin for error the men withstand storms depth charges and even hand to hand combat to defend their boat and themselves mistakes as the title reminds us result in the debris which serves as a brief grave maker for sunken ships *Dust on the Sea*

biological homogenization is the dominant process shaping the future global biosphere as global transportation becomes faster and more frequent it is inevitable that biotic intermixing will increase unique local biotas will become extinct only to be replaced by already widespread biotas that can tolerate human activities this process is affecting all aspects of our world language economies and ecosystems alike the ultimate outcome is the loss of uniqueness and the growth of uniformity in this way fast food restaurants exist in moscow and java sparrows breed on hawaii biological homogenization qualifies as a global environmental catastrophe the earth has never witnessed such a broad and complete reorganization of species distributions

this text provides a solid introduction to the foundations of research methods with the goal of enabling students and professionals in the various fields of education to not simply become casual consumers of research who passively read bits and pieces of research articles but discerning consumers able to effectively use published research for practical purposes in educational settings all issues important for understanding and using published research for these purposes are covered key principles are illustrated with research studies published in refereed journals across a wide spectrum of education exercises distributed throughout the text encourage readers to engage interactively with what they are reading at the point when the information is fresh in their minds this text is designed for higher level undergraduate and graduate programs course instructors will find that it provides a solid framework in which to promote student interaction and discussion on important issues in research methodology

theoretical results has been introduced this year a conference on a theme as broad as artificial life is bound to be very diverse but a few tendencies emerged first fields like robotics and autonomous agents or evolutionary computation are still extremely active and keep on bringing a wealth of results to the artificial life community even there however new tendencies appear like collective robotics and more specifically self assembling robotics which represent now a large subsection second new areas appear

in this classic study alan brudner investigates the basic structure of the common law of transactions for decades that structure has been the subject of intense debate between formalists who say that transactional law is a private law for interacting parties and functionalists who say that it is a public law serving the collective ends of society against both camps brudner proposes a synthesis of formalism and functionalism in which private law is modified by a common good without being subservient to it drawing on hegel s legal philosophy the author exhibits this synthesis in each of transactional law s main divisions property contract unjust enrichment and tort each is a whole composed of private law and public law parts that complement each other and the idea connecting the parts to each other is also latently present in each moreover brudner argues a single narrative thread connects the divisions of transactional law to each other not a row of disconnected fields transactional law is rather a story about the realization in law of the agent s claim to be a dignified end master of its body its acquisitions and the shape of its life transactional law s divisions are stages in the progress toward that goal each generating a potential developed by the next thus contract law fulfils what is incompletely realized in property law negligence law what is germinal in contract law public insurance what is seminal in negligence law and transactional law as a whole what is underdeveloped in public insurance the end point is the limit of what a transactional law can contribute to a life sufficient for dignity reconfigured and expanded with a contribution by jennifer nadler the unity of the common law stands out among contemporary theories of private law in that it depicts private law as purposive without being

instrumental and as autonomous without being empty formal

using science to improve the blm wild horse and burro program a way forward reviews the science that underpins the bureau of land management s oversight of free ranging horses and burros on federal public lands in the western united states concluding that constructive changes could be implemented the wild horse and burro program has not used scientifically rigorous methods to estimate the population sizes of horses and burros to model the effects of management actions on the animals or to assess the availability and use of forage on rangelands evidence suggests that horse populations are growing by 15 to 20 percent each year a level that is unsustainable for maintaining healthy horse populations as well as healthy ecosystems promising fertility control methods are available to help limit this population growth however in addition science based methods exist for improving population estimates

predicting the effects of management practices in order to maintain genetically diverse healthy populations and estimating the productivity of rangelands greater transparency in how science based methods are used to inform management decisions may help increase public confidence in the wild horse and burro program
