Medical Services in War: the Principal Medical

Lessons of the Second World War 1968 this book develops the sustainable governance approach and the principles of community based natural resource management cbnrm it provides practical examples of successes and failures in implementation and lessons about the economics and governance of wild resources with global application cbnrm emerged in the 1980s encouraging greater local participation to conserve and manage natural and wild resources in the face of increasing encroachment by agricultural and other forms of land use development this book describes the institutional history of wildlife and the empirical transformation of the wildlife sector on private and communal land particularly in southern africa to develop an alternative paradigm for governing wild resources with the twin goals of addressing poverty and resource degradation in the world s extensive agriculturally marginal areas the author conceptualises this paradigm as the sustainable governance approach which integrates theories of proprietorship and rights prices and economics governance and scale and adaptive learning the author then discusses and defines cbnrm a major subset of this approach interweaving theory and practice he shows that the primary challenges facing cbnrm are the devolution of rights from the centre to marginal communities and the governance of these rights by communities a challenge which is seldom recognised or addressed he focuses on this shortcoming extending and operationalising institutional theory including ostrom s principles of collective action within the context of cross scale governance based on the author s extensive

experience this book will be key reading for students of natural resource management sustainable land use community forestry conservation and development providing practical but theoretically robust tools for implementing cbnrm it will also appeal to professionals and practitioners working in communities and in conservation and development

Rhinoceros 2017-03-25 now in its 31st edition the europa international foundation directory 2022 provides an unparalleled guide to the foundations trusts charitable and grantmaking ngos and other similar not for profit organizations of the world it provides a comprehensive picture of third sector activity on a global scale users will find names and contact details for some 2 690 institutions worldwide this new edition has been revised and expanded to include the most comprehensive and up to date information on this growing sector indexes allow the reader to find organizations by area of activity including conservation and the environment science and technology education and social welfare and geographical region of operations e g south america central america and the caribbean australasia western europe and north america contents include a comprehensive directory section organized by country or territory details of coordinating bodies and of foundations trusts and non profit organizations a full index of organizations and indexes by main activity and by geographical area of activity

Department of the Interior and Related Agencies Appropriations for 1998 1997 one of the major

challenges of sustainable development is the interdisciplinary nature of the issues involved to this end a team of conservation biologists hunters tourist operators ranchers wildlife and land managers ecologists veterinarians and economists was convened to discuss whether wildlife outside protected areas in africa can be conserved in the face of agricultural expansion and human population growth they reached the unequivocal if controversial conclusion that wildlife can be an economic asset especially in the african savannas if this wildlife can be sustainably utilized through safari hunting and tourism using the african savannas as an example wildlife conservation by sustainable use shows that in many instances sustainable wildlife utilization comprises an even better form of land use than livestock keeping even when population pressure is high as in agricultural areas or in humid zones and wild animal species can pose a serious cost to agriculture these costs are mainly caused by small species with a low potential for safari hunting although ranching has a very low rate of return and is hardly ever profitable the biggest obstacle to the model of sustainable wildlife use outlined in wildlife conservation by sustainable use is from unfair competition from the agricultural sector such as subsidies and lack of taxation resulting in market distortion for wildlife utilization this book thus gives valuable evidence for a different way of working providing arguments for removing such distortions and thereby facilitating financially sound land use and making it a rationally sound choice to conserve wildlife
