The Future of the Academic Journal 2009-06-22 examines current issues in journals publishing and reviews how the industry will develop over the next few years with contributions from leading academics and industry professionals the book provides an authoritative and balanced view of this fast changing area there are a variety of views surrounding the future of journals and these are covered using a range of contributors online access is now taken for granted 90 per cent of journals published are now available online an increase from 75 per cent in 2003 looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers

Journals of the Century 2019-12-06 this book first published in 2002 gathers some of america s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide their choices reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract sustain professional or academic affiliations opinion leadership or agenda setting power and ongoing criticality to the study or practice of their field the book presents wholly independent reviewers none are in the employ of any publisher but each is fully credentialed and well published and many are award winners the authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

The Scientific Journal 2018-06-25 not since the printing press has a media object been as celebrated for its role in the advancement of knowledge as the scientific journal from open communication to peer review the scientific journal has long been central both to the identity of academic scientists and to the public legitimacy of scientific knowledge but that was not always the case at the dawn of the nineteenth century academies and societies dominated elite study of the natural world journals were a relatively marginal feature of this world and sometimes even an object of outright suspicion the scientific journal tells the story of how that changed alex csiszar takes readers deep into nineteenth century london and paris where savants struggled to reshape scientific life in the light of rapidly changing political mores and the growing importance of the press in public life the scientific journal did not arise as a natural solution to the problem of communicating scientific discoveries rather as csiszar shows its dominance was a hard won compromise born of political exigencies shifting epistemic values intellectual property debates and the demands of commerce many of the tensions and problems that plague scholarly publishing today are rooted in these tangled beginnings as we seek to make sense of our own moment of intense experimentation in publishing platforms peer review and information curation csiszar argues powerfully that a better understanding of the journal s past will be crucial to imagining future forms for the expression and organization of knowledge

How to Read Journal Articles in the Social Sciences 2015-07-20 this superb guide teaches you how to read critically its no nonsense practical approach uses a specially developed reading code to help you read articles for your research project this simple code enables you to decipher journal articles structurally mechanically and grammatically refreshingly free of jargon and written with you in mind it s packed full of interdisciplinary advice that helps you to decode and critique academic writing the author s fuss free approach will improve your performance boost your confidence and help you to read and better understand content take relevant effective notes manage large amounts of information in an easily identifiable and retrievable format write persuasively using formal academic language and style new to this edition additional examples across a range of subjects including education health and sociology as well as criminology refined terminology for students in the uk as well as around the world more examples dealing specifically with journal articles clear focused and practical this handy guide is a great resource for helping you sharpen your use of journal articles and improve your academic writing skills i have used the book over the last five years with my students with great success the book has helped students to develop their critical thinking reading and writing skills and when it comes to writing a dissertation they have used the code sheet in their own writing pete allison head of the graduate school of education university of edinburgh the student success series are essential guides for students of all levels from how to think critically and write great essays to planning your dream career the student success series helps you study smarter and get the best from your time at university visit the sage study skills hub for tips and resources for study success

Writing and Publishing Science Research Papers in English 2013-10-11 this book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts it deals with both english and non anglophone science writers and presents a global perspective and an international focus the book collects and synthesizes research from a range of disciplines including applied linguistics the sociology of science sociolinguistics bibliometrics composition studies and science education this multidisciplinary approach helps the reader gain a solid understanding of the subject divided into three parts the book considers the context of scientific papers the text itself and the people involved it explains how the typical sections of scientific papers are structured standard english scientific writing style is also compared with science papers written in other languages the book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers

What Editors Want 2013 research publications have always been key to building a successful career in science yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed accepted and published by leading scientific journals with what editors want philippa j benson and susan c silver two well respected editors from the science publishing community remedy that situation with a clear straightforward guide that will be of use to all scientists benson and

silver instruct readers on how to identify the journals that are most likely to publish a given paper how to write an effective cover letter how to avoid common pitfalls of the submission process and how to effectively navigate the all important peer review process including dealing with revisions and rejection with supplemental advice from more than a dozen experts this book will equip scientists with the knowledge they need to usher their papers through publication

How to Publish in Biological Sciences 2022-07-29 this book is a guide specifically for early career researchers on how to publish in the biological sciences whether that be your first manuscript or if you re already experienced there s something for everyone following on from how to write a phd in biological sciences a guide for the uninitiated it will guide you through taking your manuscript to publication in peer reviewed journals and disseminating your research more broadly it talks you through the peer review process including how to respond to reviewers comments the meaning and importance of impact factors and how to get citations it also explores the challenges in the academic community around open access and other debates including transparency overlay journals paywalls publication bias predatory journals and the dangers of bullying whether you are a student just completing your studies or a supervisor struggling with rejections this book will provide the insider information you need to get ahead

Global Academic Publishing 2017-11-22 this book reports on the state of academic journal publishing in a range of geolinguistic contexts including locations where pressures to publish in english have developed more recently than in other parts of the world e g kazakhstan colombia in addition to contexts that have not been previously explored or well documented the three sections push the boundaries of existing research on global publishing which has mainly focused on how scholars respond to pressures to publish in english by highlighting research on evaluation policies journals responses in non anglophone contexts to pressures for english medium publishing and pedagogies for supporting scholars in their publishing efforts

Towards Electronic Journals 2000 the purpose of this book is to help scientists librarians and publishers better understand the dynamic nature of the journal system so they can make more informed decisions regarding electronic journals in the future

Academic and Professional Publishing 2012-09-10 academic and professional publishing represents a diverse communications industry rooted in the scholarly ecosystem peer review and added value products and services publishers in this field play a critical and trusted role registering certifying disseminating and preserving knowledge across scientific technical and medical stm humanities and social science disciplines academic and professional publishing draws together expert publishing professionals to provide comprehensive insight into the key developments in the industry and the innovative and multi disciplinary approaches being applied to meet novel challenges this book consists of 20 chapters covering what publishers do how they work to add value and what the future may bring topics include peer review the scholarly ecosystem the digital revolution publishing and communication strategies business models and finances editorial and production workflows electronic publishing standards citation and bibliometrics user experience sales licensing and marketing the evolving role of libraries ethics and integrity legal and copyright aspects relationship management the future of journal publishing the impact of external forces career development and trust in academic and professional publishing this book presents a comprehensive review of the integrated approach publishers take to support and improve communications within academic and professional publishing brings together expert publishing professionals to provide an authoritative insight into industry developments details the challenges publishers face and the leading edge processes and procedures used to meet them discusses the range of new communication channels and business models that suit the wide variety of subject areas publishers work in

Scientific Writing and Publishing 2021-05-31 knowing how to prepare write and publish high quality research papers can be challenging for scientists at all stages of their career this manual guides readers through successfully framing and presenting research findings as well as the processes involved in publishing in learned journals it draws on the author s wealth of practical experience from working in academic research for over 40 years and teaching scientific writing in over 20 countries to gaining insights as a journal editor well written and logical it provides clear step by step instructions to enable readers to become more effective at writing articles and navigating difficulties related to journal submission the review process editing and publication it comprehensively covers themes such as publication ethics along with current topics including open access publishing and pre print servers this is a useful user friendly guide for graduate students early career scientists and more experienced researchers particularly in the life and medical sciences

E-Journals Access and Management 2008-09-01 the proliferation of e journals and their impact on library collections is tremendous e journals access and management takes a comprehensive look at how e journals have changed the library landscape and offers librarians strategies to better manage them this useful resource provides a broad overview of the practical and theoretical issues associated with the management of electronic journals and contains practical and illuminating case studies of problems faced and solutions found in individual libraries containing chapters by respected authorities on this dynamic topic of debate e journals access and management presents vital information on a full range of issues dealing with electronic resource access and management including bibliographic and web access acquisitions and licensing

A Scientific Approach to Scientific Writing 2011-05-05 this guide provides a framework starting from simple statements for writing papers for submission to peer reviewed journals it also describes how to address referees comments approaches for composing other types of scientific communications and key linguistic aspects of scientific writing

Plan S for Shock 2022-01-27 plan s for shock the open access initiative that changed the face of global research this is the story of open access publishing why it matters now and for the future in a world where information has never been so accessible and answers are available at the touch of a fingertip we are hungrier for the facts than ever before something the covid 19 crisis

has brought to light and yet paywalls put in place by multi billion dollar publishing houses are still preventing millions from accessing quality scientific knowledge and public trust in science is under threat on 4 september 2018 a bold new initiative known as plan s was unveiled kickstarting a world wide shift in attitudes towards open access research for the first time funding agencies across continents joined forces to impose new rules on the publication of research with the aim of one day making all research free and available to all what followed was a debate of global proportions as stakeholders asked who has the right to access publicly funded research will it ever be possible to enforce change on a multi billion dollar market dominated by five major players here the scheme s founder robert jan smits makes a compelling case for open access and reveals for the first time how he set about turning his controversial plan into reality as well as some of the challenges faced along the way in telling his story smits argues that the covid 19 crisis has exposed the traditional academic publishing system as unsustainable

A History of Scientific Journals 2022-10-03 modern scientific research has changed so much since isaac newton s day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers yet the use of scientific journals to report share and store results is a thread that runs through the history of science from newton s day to ours scientific journals are now central to academic research and careers their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published the journal that reported newton s optical experiments still exists first published in 1665 and now fully digital the philosophical transactions has carried papers by charles darwin dorothy hodgkin and stephen hawking it is now one of eleven journals published by the royal society of london unrivalled insights from the royal society s comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing the editorial management business practices and financial difficulties of the philosophical transactions and its sibling proceedings reveal the meaning and purpose of journals in a changing scientific community at a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Managing Scientific Information and Research Data 2015-07-14 innovative technologies are changing the way research is performed preserved and communicated managing scientific information and research data explores how these technologies are used and provides detailed analysis of the approaches and tools developed to manage scientific information and data following an introduction the book is then divided into 15 chapters discussing the changes in scientific communication new models of publishing and peer review ethics in scientific communication preservation of data discovery tools discipline specific practices of researchers for gathering and using scientific information academic social networks bibliographic management tools information literacy and the information needs of students and researchers the involvement of academic libraries in escience and the new opportunities it presents to librarians and interviews with experts in scientific information and publishing promotes innovative technologies for creating sharing and managing scientific content presents new models of scientific publishing peer review and dissemination of information serves as a practical guide for researchers students and librarians on how to discover filter and manage scientific information advocates for the adoption of unique author identifiers such as orcid and researcherid looks into new tools that make scientific information easy to discover and manage shows what escience is and why it is becoming a priority for academic libraries demonstrates how electronic laboratory notebooks can be used to record store share and manage research data shows how social media and the new area of altmetrics increase researchers visibility and measure attention to their research directs to sources for datasets provides directions on choosing and using bibliographic management tools critically examines the metrics used to evaluate research impact aids strategic thinking and informs decision making

Cases on Research Support Services in Academic Libraries 2020-08-28 academic libraries have traditionally had two key functions to support teaching and to support research in an evolving and competitive university environment along with the emergence of various technologies and substantial changes in scientific communication university management has reached a turning point academic libraries are facing a paradigm shift in the role they need to play to achieve the research objectives of universities research support services in academic libraries have evolved as a response to these changes they are heterogeneous adapt to their university culture adopt different points of view take different approaches in their organizational structures and include a diverse catalog of activities having an overview of different experiences will allow libraries to adopt best practices redefine services and even establish new management and collaboration models cases on research support services in academic libraries is a critical scholarly resource that uses case studies to systematize the experiences of research support services in academic libraries for the support of higher education faculty the cases focus on such items as the role of technology and its impact as well as how these services help to improve the excellence of universities featuring a wide range of topics such as library services data management and open science this book is ideal for librarians academicians professionals researchers and students

Expanding Perspectives on Open Science: Communities, Cultures and Diversity in Concepts and Practices 2017-06-20 twenty one years ago the term electronic publishing promised all manner of potential that the and network technologies could bring to scholarly communication scientific research and technical innovation over the last two decades tremendous developments have indeed taken place across all of these domains one of the most important of these has been open science perhaps the most widely discussed topic in research communications today this book presents the proceedings of elpub 2017 the 21st edition of the international conference on electronic publishing held in limassol cyprus in june 2017 continuing the tradition of bringing together academics publishers lecturers librarians developers entrepreneurs users and all other stakeholders interested in the issues surrounding electronic publishing this edition of the conference focuses on open science and the 27 research and

practitioner papers and 1 poster included here reflect the results and ideas of researchers and practitioners with diverse backgrounds from all around the world with regard to this important subject intended to generate discussion and debate on the potential and limitations of openness the book addresses the current challenges and opportunities in the ecosystem of open science and explores how to move forward in developing an inclusive system that will work for a much broader range of participants it will be of interest to all those concerned with electronic publishing and open science in particular

Directory of Scholarly Journals in Turkey 2017-03-07 scholarly journals are the capillaries of the scientific world ensuring the circulation of knowledge moreover scholarly journals guide and indicate the scientific development in an academic field of study or in a country scholarly journals which transfer and spread scientific information are intended to properly fulfill their functions preventing the transfer of imperfect or incorrect information to the science world significant issues are therefore inevitable in the characteristics of scientific studies in such disciplines and countries where the scholarly journals do not fulfill their functions properly this study encompasses all scholarly journals published in turkey in all fields of science and other disciplines the reference questions in this study are grouped under three main categories the contact and publication information article evaluation and publishing information the number of journals in this present study totals 1 910

Research 2009-07 for students scholars researchers investigators trainees and scientists if i have seen a little further it is by standing on the shoulders of giants isaac newton this book on research is an attempt to try to answer the basic fundamental questions that come to the minds of young students researchers scholars investigators trainees or scientists it is an outcome of collaboration between 43 researchers from 11 different countries pakistan india united states iran united kingdom nepal canada greece poland japan and australia achakzai am afghan ak ahmed a ali d ans m asad rm ashfaq a butt nm farooq f fatima m gilani ai ibrahim m ishtiaq o janjua nz kakisi o kasi pm kassi m kassi m khan sf khawar t kiani j kulkarni hs majeed a naqvi ha nawaz h oberoi dv qureshi sa rai as rathore fa rehman r sabri aa saeed f shah m shankar r sharma a sherjeel sa shoraneh f siddiqui s syed fk szlufic s yaqoob n zafar a zaidi ah although there is a lot of literature available to answer the queries that come to the mind of a young investigator the language is often too complex and difficult to understand and thus aversive some of these teaching materials sound more like experts talking to each other this book would act as a catalyst in providing useful reviews and guidance related to different aspects of research for students who need to be inducted and recognized as an integral part of the research community we hope researchers benefit from this endeavor of ours e mail pashtoon kasi gmail com website promotingresearch com

Research evaluation metrics 2015-04-27 traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la web trad julio alonso arévalo univ salamanca

Academic Journal: Editing and Publishing 2017-11-29 world university rankings were announced by thomas reuters and the times as an indian besides being one teaching for nearly five decades i was eager to know the results of the announcement i showed enough concern where have our good indian universities higher educational institutions been placed i set my eyes on top ranks and it didn t give me anything to be proud of my eyes crossed over more than two hundred and fifty names of universities of the world including those of some not so developed countries but i came across no name of indian institutions universities this upsets me what made the indian educational scenario virtually get eclipsed by the scenarios of the rest of the world i drew a comparison between the higher education in india with that of many other countries the world education scene in general occupied a higher level of degree in research and publication than that of the indian education scene research flourishes when research is brought to light through publication i always advocate sound growth in indian education this can be achieved if

we improve journal publication this awareness has resulted in this book therefore journal publishing is a cultural imperative this book is designed to help readers understand what a journal is the people who are responsible for the creation and production of this journal how a journal is published where a journal flourishes and why it is mandatory in education development i have taken materials from all over the world and all these sources have been acknowledged in the references but for them this book would not have been a reality

Author's Guide to Journals in Library & Information Science 2019-12-05 this book first published in 1982 focuses on providing information about the policies and practices surrounding the preparation and submitting of articles to the major journals in library and information science this guide includes all the major american canadian british and international professional journals that solicit accept and publish articles in the field

Directory of Electronic Journals, Newsletters, and Academic Discussion Lists 1992 with 1992 includes electronic journals electronic newsletters hypercard stacks digest newsletters and academic discussion lists and interest groups

Current Contents of Academic Journals in Japan 1972 this is the story of open access publishing why it matters now and for the future in a world where information has never been so accessible and answers are available at the touch of a fingertip we are hungrier for the facts than ever before something the covid 19 crisis has brought to light and yet paywalls put in place by multi billion dollar publishing houses are still preventing millions from accessing quality scientific knowledge and public trust in science is under threat on 4 september 2018 a bold new initiative known as plan s was unveiled kickstarting a world wide shift in attitudes towards open access research for the first time funding agencies across continents joined forces to impose new rules on the publication of research with the aim of one day making all research free and available to all what followed was a debate of global proportions as stakeholders asked who has the right to access publicly funded research will it ever be possible to enforce change on a multi billion dollar market dominated by five major players here the scheme s founder robert jan smits makes a compelling case for open access and reveals for the first time how he set about turning his controversial plan into reality as well as some of the challenges faced along the way in telling his story smits argues that the covid 19 crisis has exposed the traditional academic publishing system as unsustainable

Plan S for Shock 2022 this book offers a considered yet entertaining reflection on the progress of modern scientific research the winding path of science can only be understood by revealing the personal human side of scientific research demystifying the actions of the scientist and exposing the human drama on the stage of science the book looks at the true nature of contemporary science and scientists through the lens of the personal experiences of the author a renowned and leading materials scientist over the last half century it examines the positive threads of modern scientific progress in sober juxtaposition to the manifest negative developments arising from stiff competition within the current academic landscape a collection of stories and real life anecdotes is presented in parallel to the career of the author providing a first hand account of important achievements in the field of materials science as a result this book provides fascinating reading for students seasoned scientists and anybody else interested in the workings and machinations of modern science

How Science Runs 2022-02-17 cronin a master of the subject examines the complex relationship between authorship individual or collective and the reward system of science in the face of the burgeoning growth of scholarly communication he answers the myriad questions raised from how responsibility and credit are allocated in collaborative endeavors to what the intellectual property impact could be in online and open access publishing

The Hand of Science 2005 now in its second edition this internationally best selling book has been revised and updated it focuses on helping people overcome some of the most common obstacles to successful publication lack of time an unconscious fear of rejection conflicting priorities in this the first book to address the subject abby day explains how to overcome these obstacles and create publishable papers for journals most likely to publish them she shows how to identify a suitable journal and how to plan prepare and compile a paper that will satisfy its requirements she pays particular attention to the creative aspects of the process as an experienced journal editor and publisher dr day is well placed to reveal the inside workings of the reviewing procedure and the more fully you understand this the greater the chance that what you submit will be accepted and published for academic and research staff in whatever discipline a careful study of dr day s book could be your first step on the road to publication

How to Get Research Published in Journals 2017-03-02 knowledge is a result of never ending processes of circulation this accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of anglo american paradigms through a variety of literature reviews examples of recent research and in depth case studies the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies bringing diverse viewpoints from across the globe and from a range of disciplines including anthropology economics history political science sociology and science technology studies sts this wide ranging and thought provoking collection offers a broad and cutting edge overview of outstanding research on academic knowledge circulation the book is structured in seven sections i key concepts in studying the circulation of academic knowledge ii spaces and actors of circulation iii academic media and knowledge circulation iv the political economy of academic knowledge circulation v the geographies geopolitics and historical legacies of the global circulation of academic knowledge vi the relationships between academic and extra academic knowledges and vii methodological approaches to studying the circulation of academic knowledge this handbook will be essential reading for academics researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge

Routledge Handbook of Academic Knowledge Circulation 2023-06-30 the art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist it is also an ability that despite its importance is often overlooked by research courses and senior level mentors this straightforward pocket guide to preparing research articles steps into the void as an insider's guide to getting published drawing on nearly 20 years of experience editing a social work research journal bruce a thyer has crafted a candid companion to the journal publishing process unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve thyer's frank advice on selecting an appropriate journal handling rejections and revisions understanding confusing concepts like impact factors and electronic publishing and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher writer

Preparing Research Articles 2008-02-14 the formal scientific communication system is currently undergoing significant change this is due to four developments the digitisation of formal science communication the economisation of academic publishing as profit drives many academic publishers and other providers of information an increase in the self observation of science by means of publication citation and utility based indicators and the medialisation of science as its observation by the mass media intensifies previously these developments have only been dealt with individually in the literature and by science policy actors the future of scholarly publishing documents the materials and results of an interdisciplinary working group commissioned by the berlin brandenburg academy of sciences and humanities bbw to analyse the future of scholarly publishing and to make recommendations on how to respond to the challenges posed by these developments as per the working group's intention the focus was mainly on the sciences and humanities in germany however in the course of the work it became clear that the issues discussed by the group are equally relevant for academic publishing in other countries as such this book will contribute to the transfer of ideas and perspectives and allow for mutual learning about the current and future state of scientific publishing in different settings

The Future of Scholarly Publishing 2017-10-10 academic writing in a global context addresses the issue of the pressure on academics worldwide to produce their work in english in scholarly publishing and why the growth of the use of academic english matters drawing on an eight year text ethnographic study of the experiences of fifty scholars working in europe this book discusses these questions at both a macro and micro level through discussions of knowledge evaluation systems on all levels and analysis of the progress of a text towards publication in addition to this case studies of individual scholars in their local institutions and countries are used to illustrate experiences of using english in the academic world academic writing in a global context examines the impact of the growing dominance of english on academic writing for publication globally the authors explore the ways in which the global status attributed to english is impacting on the lives and practices of multilingual scholars working in contexts where english is not the official language of communication and throws into relief the politics surrounding academic publishing this book will be of interest to postgraduates and professionals in the fields of world englishes language and globalization and english language teaching

Professional Academic writing in Global Context 2010-04-30 30 years of peer reviewed studies on the corporate ties and vested interests that influence scientific research for over 500 years groups and organizations with political economic and personal interests have successfully exercised influence on the pursuit of scientific inquiry and knowledge history is replete with examples like the papal authority muddying research into studies of the cosmos but far less attention is paid today to the various corporate and special interest groups who through funding and lobbying efforts have been able to shape the modern academic and scientific landscape to fit their agenda in conflicts of interest within science author sheldon krinsky compiles 21 peer reviewed academic articles that examine the complex relationship between the individual scientists conducting research and the groups who fund them ultimately krinsky's call to action concerns a collective movement among authors peer reviewers corporations and journal editors to disclose the sources of their funding by holding scientists and the groups that fund them more accountable through increased transparency we as a society can begin to rebuild trust in the integrity of knowledge

Conflicts of Interest In Science 2019-01-29 this is an invaluable guide to better research communication within and beyond academia with many years of research experience the authors provide scholars and scientists with systematic advice on how to ensure their research reaches its potential and grows the recognition influence practical application and public understanding of science and scholarship it begins by examining how citations work and evaluating the different measures of academic influence from legacy bibliometric systems to altmetrics and digital metrics subsequent chapters show readers how to craft impactful journal articles work effectively with co authors create a portfolio of publications and build a digital strategy that promotes knowledge exchange checklists help readers decide how and in what format to publish enabling them to get their research in front of the right people throughout the authors illustrate impact with data drawn from a wide range of disciplines maximizing the impacts of academic research is ideal for phd students and early career researchers taking their first steps into academic research experienced researchers mentoring the next generation of scholars and scientists and established academics looking to systematically review and upgrade their existing impact practices

Maximizing the Impacts of Academic Research 2020-10-10 busy academics must publish to fulfil research output they must write to a specific journal style and high standard while juggling other professional tasks this book develops understanding of how writing happens what good writing looks and feels like what gets published and what does not and why

Core List of Books and Journals in Science and Technology 1987-10 aimed at academics academic managers and administrators professionals in scientometrics information scientists and science policy makers at all levels this book reviews the

principles methods and indicators of scientometric evaluation of information processes in science and assessment of the publication activity of individuals teams institutes and countries it provides scientists science officers librarians and students with basic and advanced knowledge on evaluative scientometrics especially great stress is laid on the methods applicable in practice and on the clarification of quantitative aspects of impact of scientific publications measured by citation indicators written by a highly knowledgeable and well respected scientist in the field provides practical and realistic quantitative methods for evaluating scientific publication activities of individuals teams countries and journals gives standardized descriptions and classification of the main categories of evaluative scientometrics

Writing for Academic Journals 2013-09-01 shon s writing is engaging and entertaining he opens up the black box of academic reading and writing explaining how to decode and critique formal scientific writing and systematically organize information gained from reading journal articles dr lorraine whitmarsh school of psychology university of cardiff uk once the reader has mastered philip shon s codes and applied them to texts it will become increasingly impossible not to write and critique with integrity i thoroughly recommend this book professor helen cowie faculty of health and medical sciences university of surrey uk many texts provide tips for successfully writing theses dissertations and journal articles all argue that writing is like any other skill it has to be developed taught and practiced daily the same is certainly true of academic reading yet many advanced students have trouble with the essential skill of reading critically this handy guide teaches you how to read so you re able to maximize your output in the writing process whether you re a student or early career researcher the author s unique reading code teaches you how to approach social and behavioural science journal articles as texts that can be deciphered structurally mechanically and grammatically the strategies included allow you to systematize the reading note taking and organizing of voluminous amounts of information in an easily identifiable and retrievable format which will be a huge confidence boost to anyone who struggles with this first phase in the writing process this book is indispensable for social and behavioural science students and researchers worldwide wanting to sharpen their critical evaluative skills for better academic writing sage study skills are essential study guides for students of all levels from how to write great essays and succeeding at university to writing your undergraduate dissertation and doing postgraduate research sage study skills help you get the best from your time at university visit the sage study skills website for tips quizzes and videos on study success

The Evaluation of Research by Scientometric Indicators 2010-01-20 a how to guide to mastering the skills you need to navigate the murky waters of an academic science career effectively
