despite being one of the most successful motorcycles of all time the royal enfield bullet has had a very chequered history its story begins in the 1930s and by the 1950s it was at the height of its popularity in post war britain then it became a stalwart of the indian army and manufacture transitioned from britain to india the near collapse of the royal enfield margue in the 1990s almost meant the end of this classic motorbike but with the involvement of the eicher group from 2001 onwards the updated bullet generated new interest and renewed its original commercial success just like a phoenix rising from the ashes with over 200 photographs this book describes the origins of the royal enfield company and the pre war bullets from 1932 and the relaunch of the bullet in 1949 with its radical swinging arm frame derivative models such as the 350 and 500 as well as those for competition and road are covered as well as specials such as diesels v twins egli and big bore bullets the development story behind the lean burn electric start and 5 speed updates is discussed as well as the uce the all new bullet from 2008 and the classic and its design story finally the evolution beyond the bullet is covered which includes the continental gt and himalyan 650 twins

first published in 1991 this volume containing the proceedings of a conference

organised by the science technology and development std forum in association with the developing countries research unit dcru university of strathclyde on 9 10 april 1990 is a modest attempt at advancing awareness concerning third world development mainly in two inter related areas a the problems faced in the advancement of science and technology in the third world and b the use of scientific and technological knowledge for promoting sustainable development of these countries given the multi disciplinary character of the conference and in particular the variety of approaches adopted by the contributors any attempt to synthesise the papers in a brief introduction is likely to be futile the best that can be done is to introduce some of the papers in a brief review but before that a few words on the objectives of the conference and in particular on the need for north south cooperation in science technology and development may be helpful
