do no harm is neurosurgeon henry marsh s memoir with a particular focus on his mistakes and regrets marsh admits that he grew up privileged he began his college career studying english but quit school due to an unrequited love he took a job working in a mining town hospital an experience that inspired him to become a surgeon he returned to oxford to finish his degree and then attended the royal free medical school in london the only medical school at the time that did not require him to have any scientific qualifications as a medical student marsh worked as a nursing assistant on the psycho geriatric ward of a long term psychiatric hospital there he saw many patients who had been given lobectomies at the hospital where he would later train lobectomies were an accepted method of treating severe mental disorders but would often leave the patient worse off than they were before inside this instaread summary analysis of do no harm summary of book introduction to the important people in the book analysis of the themes and author s style

## ***Summary of Do No Harm***

2016-03-29

do no harm is a book by henry marsh and he reflects on his career mistakes and things he wished he would have done differently it is a retrospective look on his life and career it deals with death or disability to some of his patients despite his best intentions at making them better and taking away their ailments and pain these unwanted outcomes came from a variety of reasons marsh was not affected any differently by a patient s death regardless of whether it came from a direct fault of marsh s or by other means regardless of his decision of treatment for a patient either one type of treatment versus another or no treatment at all marsh took the responsibility on himself personally rather than putting it on fellow staff or the hospital marsh developed a trust with his patients which allowed him to better treat them or formulate a plan by which to treat them

sensational sunday times no bestseller extraordinary both exhilarating and alarming fascinating daily mail wonderful a testament to the tenacity of the human spirit financial times henry marsh has spent four decades operating on the human brain in this searing and provocative memoir following his retirement from the nhs he reflects on the experiences that have shaped his career and life gaining a deeper understanding of what matters to us all in the end

**No Harm, No Foul**

2016-04-15

crammed with provocative insights raw emotion and heartbreaking dilemmas the new york times first do no harm is a powerful examination of how life and death decisions are made at a major metropolitan hospital in houston as told through the stories of doctors patients families

and hospital administrators facing unthinkable choices what is life worth and when is a life worth living journalist lisa belkin examines how these questions are asked and answered over one dramatic summer at hermann hospital in houston texas in an account that is fascinating revealing and almost novelistic in its immediacy belkin takes us inside a major hospital and introduces us to the people who must make life and death decisions every day as we walk through the hallways of the hospital we meet a young pediatrician who must decide whether to perform a risky last ditch surgery on a teenager who has spent most of his fifteen years in a hospital we watch as new parents battle with doctors over whether to disconnect their fragile premature twins from the machine that keeps them breathing we are in the operating room as a poor immigrant paralyzed from a gunshot in the neck is asked by doctors whether or not he wishes to stay alive we witness the worry of a kidney specialist as he decides whether or not to transfer an uninsured baby to the county hospital down the road we experience critical moments in the lives of these real people as belkin explores challenging issues and questions involving medical ethics human suffering modern technology legal liability and financial reality as medical technology advances the choices grow more complicated how far should we go to save a life who decides and who pays

the past comes rearing up to bite the next generation when a son digs too deep into his family s past martin firestone can t figure why his father the eccentric painter leo firestone is throwing a fit all martin did was tell his dad he d been accepted to medical school then leo tells martin a story about his own father dr samuel firestone an extraordinarily gifted doctor and a living legend in the small city of hobart nj but a man with a serious character flaw during the summer of 1943 while leo worked as samuel s extern he witnessed some highly questionable behavior illegal abortions supplying heroin to an addict black market pharmaceuticals babies sold to adoptive parents all in a day s work for samuel firestone m d when leo decided his father was covering up a murder he and his girlfriend stage struck harmony followed a trail of clues into the fleischmann scrapyard there they ran afoul of old oscar fleischmann samuel s longtime nemesis by the time leo realized he and harmony were in far over their sixteen year old heads it was too late to call off the investigation but there are loose threads in leo s story martin picks them up and sixty years after the fact goes snooping in hobart and like his father he comes away with a whole lot more junk than he d bargained for

2002

in water brings no harm matthew v bender explores the history of community water management on mount kilimanjaro in tanzania kilimanjaro s chagga speaking peoples have long managed water by employing diverse knowledge hydrological technological social cultural and political since the 1850s they have encountered groups from beyond the mountain colonial officials missionaries settlers the independent tanzanian state development agencies and climate scientists who have understood water differently drawing on the concept of waterscapes a term that describes how people see water and how physical water resources intersect with their own beliefs needs and expectations

bender argues that water conflicts should be understood as struggles between competing forms of knowledge water brings no harm encourages readers to think about the origins and interpretation of knowledge and development in africa and the global south it also speaks to the current global water crisis proposing a new model for approaching sustainable water development worldwide

# First Do No Harm

1990

jim meehan british psychologist poet and amateur philosopher was asked by one of his mentors eminent american psychologist dr william e hall to consider what attitudes are essential to the establishment of trust which hall regarded as being at the heart of all good human relationships meehan came up with ten words in the form of two promises that provide the title for this book i mean you no harm i seek your greatest good the book starts as meehan attempts to answer the question he is often asked where do these words come from born in liverpool in the same hospital and same year as paul mccartney meehan uses mccartney s account of the composition of his bestselling song yesterday to describe a similar experience that gave birth to his ten word mantra which captures the heart of trust meehan offers some possible biographical contributing factors beginning with a section aptly titled my yesterdays he explores some early childhood relationships and experiences in liverpool toward the end and shortly after the second world war and investigates his adolescence which was spent mainly in birmingham england s second largest city he then turns his attention to the influence of five mentors who definitely meant him no harm and sought his greatest good to examine how instrumental they could have been in the formulation of the words having exhausted his search for the origin of the expression he then discusses the meaning of trust and how the two promises when exchanged with other people start a journey toward total mutual trust meehan defines different forms of trust draws on the views of certain philosophers psychologists and exemplars of trust and addresses the current global crisis of trust or rather lack of trust he also includes a few anecdotes that describe the meaningfulness of the ten words to others at the beginning of his account meehan explains how these two promises have developed legs of their own and have traveled widely since first being written in 1997 he finishes the book by posing the question where are the words going certainly the book could be said to have given the ten words some wings or at least some more legs in his epilogue he provides attempts he has made to catch the essentials of total mutual trust and related concepts in verse
