welcome to the proceedings of ubicomp 2004 in recent years the ubiquitous computing community has witnessed a sign cant growth in the number of conferences in the area each with its own disti tive characteristics for ubicomp these characteristics have always included a high quality technical program and associated demonstrations and posters that cover the full range of research being carried out under the umbrella of ubiq tous computing ours is a broaddiscipline andubicomp aims to be aninclusive forum that welcomes submissions from researchers with many di erent ba grounds this year we received 145 submissions of these we accepted 26 an acceptance rate of just under 18 of course acceptance rate is simply a m sure of selectivity rather than quality and we were particularly pleased this year to note that we had a large number of high quality submissions from which to assemble the program for 2004 the broad nature of ubiquitous computing research makes reviewing ubi comp submissions a particular challenge this year we adopted a new process

for review and selection that has we hope resulted in all authors obtaining tremely detailed feedback on their submission whether or not it was accepted for publication we believe the process enabled us to assemble the best pos ble program for delegates at the conference if you submitted a paper we hope that you bene ted from the feedback that your peers have provided and if you attended ubicomp 2004 we hope that you enjoyed the technical program
