it is sometimes said that the most segregated time of the week in the united states is sunday morning even as workplaces and public institutions such as the military have become racially integrated racial separation in christian religious congregations is the norm and yet some congregations remain stubbornly racially mixed people of the dream is the most complete study of this phenomenon ever undertaken author michael emerson explores such questions as how do racially mixed congregations come together how are they sustained who attends them how did they get there and what are their experiences engagingly written the book enters the worlds of these congregations through national surveys and in depth studies of those attending racially mixed churches data for the book was collected over seven years by the author and his research team it includes more than 2 500 telephone interviews hundreds of written surveys and extensive visits to mixed race congregations

throughout the united states people of the dream argues that multiracial congregations are bridge organizations that gather and facilitate cross racial friendships disproportionately housing people who have substantially more racially diverse social networks than do other americans the book concludes that multiracial congregations and the people in them may be harbingers of racial change to come in the united states

the question of energy is among the most vital for the future of humanity and the flourishing of life on this planet yet only very rarely if at all do we ask what energy is what it means what ends it serves and how it is related to actuality meaning making and instrumentality energy dreams interrogates the ontology of energy from the first coinage of the word *energeia* by aristotle to the current practice of fracking and the popularity of energy drinks its sustained multi disciplinary investigation builds a theoretical infrastructure for an alternative energy paradigm this study unhinges stubbornly held assumptions about energy conceived in terms of a resource to be violently extracted from the depths of the earth and from certain living beings such as plants converted into biofuels a thing that teetering on the verge of depletion sparks off movement and is incompatible with the inertia of rest consulting the insights of philosophers theologians psychologists and psychoanalysts economic and political theorists and physicists michael marder argues that energy is not only a coveted object of appropriation but also the subject who dreams of amassing it that it not only resides in the dimension of depth but also circulates on the surface that it activates rest as much as movement potentiality as much as actuality and that it is both the means and the end of our pursuits ultimately marder shows that instead of being grounded in utopian naïveté the dreams of another energy to be procured without devastating everything in existence derive from the suppressed concept of energy itself
