Instructional Design for LIS Professionals

2019-05-03

a practical work outlining the theory and practice of using active learning techniques in library settings it explains the theory of active learning and argues for its importance in our teaching and is illustrated using a large number of examples of techniques that can be easily transferred and used in teaching library and information skills to a range of learners within all library sectors these practical examples recognise that for most of us involved in teaching library and information skills the one off session is the norm so we need techniques that allow us to quickly

grab and hold our learners attention the examples are equally useful to those new to teaching who wish to bring active learning into their sessions for the first time as to those more experienced who want to refresh their teaching with some new ideas and to carry on their development as librarian teachers outlines the argument for more active learning techniques in our sessions explains the theory of active learning includes examples that can be used in teaching
