The Mystery of Consciousness

1998

in what began as a series of essays in the new york review of books searle discusses the arguments of such well known thinkers as francis crick gerald edelman roger penrose daniel dennett israel rosenfield and david chalmers these appear here together with a new essay of his own

Evolution of Consciousness

2004

this book is a step by step excursion into the unfolding of consciousness it merges science and spirituality in simple christian terms to attune the reader to body mind and spirit the book begins with the knowledge of our oneness with a god that is everywhere in pureconsciousness and then it leads one to the ultimate christian goal the book attunes the reader to science and spirituality because they are not divorced but compliment each other scientist and prophets through out all the ages of civilization have recognized the immense power that governs and controls the universe

Energies and Patterns in Psychological Type

2016-06-17

this book encapsulates john beebe s influential work on the analytical psychology of consciousness building on c g jung s theory of psychological types and on subsequent clarifications by marie louise von franz and isabel briggs myers beebe demonstrates the bond between the eight types of consciousness jung named and the archetypal complexes that impart energy and purpose to our emotions fantasies and dreams for this collection beebe has revised and updated his most influential and significant previously published papers and has introduced in a brand new chapter a surprising theory of type and culture beebe s model enables readers to take what they already know about psychological types and apply it to depth psychology the insights contained in the fifteen chapters of this book will be especially valuable for jungian psychotherapists post jungian academics and scholars psychological type practitioners and type enthusiasts

Consciousness

2023-07-06

climb aboard an ark that is hidden inside everyone it is the ship of the witnessing soul world renowned nostradamus expert futurist and prophecy scholar john hogue takes you into the world of spiritual rebellion and personal revelations about his direct 37 year participation in a new religious movement trying to give birth to a new humanity one heart and one eternal moment at a time hogue will introduce the indian mystic osho in a new light you will enter first hand through the autobiographical experiences of this author osho s buddhafield experiment set to awaken human consciousness you ll read osho s prophecy recorded in 1983 that is exactly describing our darkening times today such times require a new noah s ark to save humanity this collective awakening is never more needed than now to create a new humanity our humanity

A Spiritual Rebel's Manifesto: Climb Aboard the Noah's Ark of Consciousness

2017-12-23

new essays connecting recent scientific studies with traditional issues about the self explored by descartes locke and hume leading philosophers offer contrasting perspectives on the relation between consciousness and self awareness and the notion of personhood essential reading for philosophers neuroscientists cognitive scientists and psychologists

Consciousness and the Self

2012

on cosmic consciousness peak experiences and transcendental unconscious includes articles by stanley krippner aldous huxley r d laing alan w watts abraham maslow p d ouspensky arthur waley and norman o brown

The Highest State of Consciousness

1972

scientists may be approaching the finish line in the race to understand consciousness john taylor introduces the contending theories including his own there is a sense among scientists that the time is finally ripe for the problem of consciousness to be solved once and for all the development of new experimental and theoretical tools for probing the brain has produced an atmosphere of unparalleled optimism that the job can now be done properly the race for consciousness is on in this book john taylor describes the complete scene of entries riders gamblers and racecourses he presents his own entry into the race which he has been working on for the past twenty five years the relational theory of consciousness according to which consciousness is created through the relations between brain states especially those involving memories of personal experiences because it is an ongoing and adaptive process consciousness emerges from past brain activity it is this highly subtle and delicate process of emergence that leads to the complexity of consciousness taylor does not just present another theory of consciousness but makes comprehensible the nuts and bolts methodology behind the myriad attempts to win the race

The Race for Consciousness

2001-08-24

this book is a systematic analysis of john r searle s philosophy of mind searle s view of mind as a set of subjective and biologically embodied processes can account for our being part of nature qua mindful beings this model finds support in neuroscience and offers reliable solutions to the problems of consciousness mental causation and the self

Beyond Conceptual Dualism

2008

in this major new work john searle launches a formidable attack on current orthodoxies in the philosophy of mind more than anything else he argues it is the neglect of consciousness that results in so much barrenness and sterility in psychology the philosophy of mind and cognitive science there can be no study of mind that leaves out consciousness what is going on in the brain is neurophysiological processes and consciousness and nothing more no rule following no mental information processing or mental models no language of thought and no universal grammar mental events are themselves features of the brain like liquidity is a feature of water beginning with a spirited discussion of what s wrong with the philosophy of mind searle characterizes and refutes the philosophical tradition of materialism but he does not embrace dualism all these isms are mistaken he insists once you start counting types of substance you are on the wrong track whether you stop at one or two in four chapters that constitute the heart of his argument searle elaborates a theory of consciousness and its relation to our overall scientific world view and to unconscious mental phenomena he concludes with a criticism of cognitive science and a proposal for an approach to studying the mind that emphasizes the centrality of consciousness to any account of mental functioning in his characteristically direct style punctuated with persuasive examples searle identifies the very terminology of the field as the main source of truth he observes that it is a mistake to suppose that the ontology of the mental is objective and to suppose that the methodology of a science of the mind must concern itself only with objectively observable behavior that it is also a mistake to suppose that we know of the existence of mental phenomena in others only by observing their behavior that behavior or causal relations to behavior are not essential to the existence of mental phenomena and that it is inconsistent with what we know about the universe and our place in it to suppose that everything is knowable by us

The Rediscovery of the Mind

1992-07-08

altered states of consciousness comprise unusual conditions of perception achieved by the deliberate cultivation of often abnormal mental states this practice continues to increase in popularity today the most recent pop culture example of this teaching is found in eckhart tolle s writing his teachings and books were featured as part of oprah s popular talk show resulting in study groups of his teachings across america and beyond the authors share the major problems and potential dangers that are involved as well as give a biblical evaluation of this practice

Knowing the Facts about Altered States of Consciousness

2012-08-14

depth psychology as well and most therapeutic psychologies give an ambiguous picture of ego consciousness they say this form of consciousness is necessary for functioning efficiently and effectively in the world but this way of our usual consciousness does not encompass either soul or spirit this writing shows that the gospel of john reveals the processes by which ego consciousness undergoes transformation into soul spirit i consciousness and a new effectiveness functioning in the world

Frontiers of Consciousness

1985

this is the story of four young friends whose routines are disrupted one day by an intrusion of four

possible futures into their present thus shaping their lives over time and finally becoming their actual future but in ways that none of them could have predicted the making of this book reflects a similar process in the author a possible future in the shape of a dream intersected with the author's present and his life began to alter in quite unexpected ways as the dream slowly manifested into what became finally his actual future the record of which is this story thus the author of manifesting possible futures a new genre of literature future explores an art form which reflects the psychological process by which it comes into being in the first place

The Gospel of St. John As a Foundation of Spiritual Psychology

2017-03-18

is there an internal relationship between consciousness and intentionality can mental content be described in such a way so as to avoid dualism what is the influence of social context upon consciousness conceptions of self and mental content this book considers questions such as these and argues for a conception of consciousness mental content and intentionality that is anti cartesian in its major tenets focusing upon the rule governed nature of concepts and the grounding of the rules for concept use in the practical world intentional consciousness emerges as a phenomena that depends upon social context given that dependence the authors consider and set aside attempts to reduce human consciousness and intentionality to phenomena explicable at biological or neuroscientific levels series a

Ur-Image

2013-07-02

consciousness is evolving and we are evolving with it today we are at the beginning of an evolutionary step forward for consciousness a revolution of sorts john smotherman making his contribution to the world author john smotherman shares with you the greatest discovery of his life raising consciousness is the most powerful fulcrum for increasing personal happiness and leveraging the world into a better place for everyone the consciousness of the world at large holds the greatest hope and potential boon to people who live in the most desperate of circumstances we have the means to alleviate extreme poverty and the desperation and ills associated with it if we can muster the will empathy for others is the doorway through which love enters our lives learning to truly empathize with all of humanity is one of the most fulfilling things we can do it gives life a gravity of meaning and purpose that fulfills us at levels the ego cannot reach shifting paradigms to view the world differently as one collective human consciousness could drastically improve the kind of earth our children and our children's children will inherit

Consciousness and Intentionality

2001-02-13

in this text the author seeks to provide a non dualistic and multidisciplinary explanation of what it means to be a conscious human being the issues raised by the sciences of complexity chaos theory nonlocality and neurophysiology are incorporated in a theory of consciousness

The Consciousness Paradigm

2010-05-13

in this much needed contribution toward an understanding of the complexity of human consciousness john boghosian arden ph d demonstrates that within the three broad subsystems biophysiology sociocultural dynamics and intrapsychic aspects not only do further subsystems exist but so does a great degree of interconnectivity biophysiological processes cannot be conceptualized without considering individual psychological and sociocultural factors to understand the evolution of human consciousness one must take into account the systemic co evolutionary nature of all aspects of consciousness in this clearly written volume arden describes consciousness as a multidimensional fluid process in which bi directional causal interrelationships occur in one unifying and multidisciplinary theory he deals with issues of causality determinism versus free will and the mind body connection arden s fresh attempt to describe consciousness factors in the changes occurring in evolutionary theory chaos theory and logic

Science, Theology, and Consciousness

1998-03-25

john wheeler met bob adamson a student of nisargadatta maharaj on a trip to australia in 2003 in short order bob cleared up john s doubts and questions and pointed out to him the fact of our real nature self shining ever present awareness bob adamson has encouraged john to share this understanding of who we really are the articles contained in this book extended by another 30 articles in this edition cover some of john s experiences with meeting sailor bob adamson and various aspects of the understanding which subsequently unfolded interspersed with these are chapters of email correspondence with enquirers who have been drawn to this radical and direct approach to self realisation

Consciousness, Dreams, and Self

1996

perhaps the primary field of our something is consciousness in action which resembles particle to particle encounter consciousness enables each unit of itself forward consciousness has an immediacy we don t understand but by considering it we can have clearer thoughts about cause and effect the separable nature of things freewill and fate time and distance is also carpet like and connected yet separable before entering robot city we ought to study consciousness before the human i slips away

Being Conscious of Consciousness

1997

understanding consciousness by taking the stream of consciousness seriously a general characterization of experience and a detailed description of experience from within drawing on theories of william james alfred north whitehead john searle and gerald edelman in onflow ralph pred supplies an account of the nature of consciousness that grapples with the raw un verbalized stream of experience unlike other recent philosophical accounts of consciousness pred s analysis deals with the elusive and commonly neglected continuities in the stream of consciousness pred offers a general characterization and analysis of experience as well as a highly detailed interpretation of experience from within determined to make conceptual contact with the immediacy of actual experience pred carries forward

the radical empiricism pioneered by william james who coined the term stream of consciousness and draws on the process philosophy of alfred north whitehead to help readers apprehend the formation of conscious thoughts the intertwining of perception and action and the working of consciousness in onflowing experience pred applies methods of analysis developed in john searle s theory of intentionality to james s views thereby showing how intentional states are embedded in the stream of consciousness then calling on whitehead s treatment of lived moments as acts of experience pred provides an account of consciousness that at once deals with conscious thoughts as they emerge from and function in embodied socialized experience and illustrates how language distorts our understanding of experience and subjectivity finally he details striking parallels between this account and gerald edelman s biological theory of consciousness and in contrasting the two argues for a revitalized version of the experiential monism originally formulated by james

Awakening to the Natural State

2004-09

science has proven that vast domains of energy exist within the material world of our senses in this book therapeutic experience is combined with scientific evidence to create a general theory of how this great field is the foundation of everything in the universe including the personal energy we call soul

Accordance

2014-06-25

extrapolates our current understanding of consciousness from something that happens in less than the blink of an eye a single moment of the mind s inner workings jacket

Onflow

2005-02-25

personal growth is a slow process so slow that most people are unaware of the fact that fundamentally we do change several times during our lives on the way is about these personal transformations it describes how growth of consciousness happens and how we can measure where we are in our individual growth what comes next for us and why it illustrates how at all levels of development we can learn to guide our own growth individual consciousness grows through five distinct phases the first is the consciousness of young children and of primitive adults here people trust their instincts more than their feelings or their rational objectivity in the second phase of consciousness typical of the teenager feelings take precedence over instincts and objectivity this changes in the third phase when instincts and emotions become less than trustworthy and objectivity and rationality take over as the most reliable sources of awareness yet there is a fourth phase of consciousness where even objective rational thinking no longer appears trustworthy then intuition becomes the most reliable form of information this is the consciousness of the spiritual seeker to very few a sudden flash of insight happens resulting in a final fifth phase of consciousness enlightenment the book consists of three parts the first is about how consciousness grows through the first three phases the second deals with the various paths of spiritual seekers and the third focuses on which spiritual practice can be expected to be most effective for whom

The Continuity of Consciousness

1934-01-01

in freedom and neurobiology john searle discusses the possibility of free will within the context of contemporary neurobiology he begins by explaining the relationship between human reality and the more fundamental reality as described by physics and chemistry then he proposes a neurobiological resolution to the problem by demonstrating how various conceptions of free will have different consequences for the neurobiology of consciousness in the second half of the book searle applies his theory of social reality to the problem of political power explaining the role of language in the formation of our political reality he argues that consciousness and rationality are the result of the biological evolution of our species in conclusion he addresses the problem of free will within the context of a neurobiological conception of consciousness and rationality and he addresses the problem of political power within the context of this analysis from back cover

The Great Field

2007-11-15

john g deville shows in his book that before him philosophers ignorance of the human brain prevented them from knowing anything about bio electromagnetism as a result they were using unproven postulates and ambiguous expressions to create theories full of questionable premises and conclusions that s why ludwig wittgenstein once said philosophy leaves everything as it is in this book deville has destroyed some 4 000 years of philosophy to convince the new world that philosophy is not the same any more he is the first philosopher to introduce the irrefutable concept of preconsciousness to show that neonates and very young children up to the age of about five years old are preconscious because they don t have the levels of consciousness required for conscious thoughts to occur in their cerebrum or the frontal lobe

Going Inside

2001

john locke s foundational place in the history of british empiricism and liberal political thought is well established so in what sense can locke be considered a modern european philosopher identity and difference argues for reassessing this canonical figure closely examining the treatise on identity added to the second edition of an essay concerning human understanding etienne balibar demonstrates locke s role in the formation of two concepts central to the metaphysics of the subject consciousness and the self and the complex philosophical legal moral and political nature of his terms with an accompanying essay by stella sandford situating balibar s reading of locke in the history of the reception of the essay and within balibar s other writings on the subject identity and difference rethinks a crucial moment in the history of western philosophy

On the Way

2012-08

in this very special book john randolph price writes about a very vivid dream during the night of january 1 1998 where he was emphatically denied access to the secret gate leading to cosmic consciousness both curious and concerned he pondered what to do next then he was suddenly given

the specific instruction see jesus for the code this unique story will teach you what it means to be spiritual in this world

Freedom and Neurobiology

2007

the natural problem of consciousness is the problem of understanding why there are presently conscious beings at all given a non reductive naturalist framework taking consciousness as an ontologically subjective biological phenomenon how can we rationally explain the fact that the actual world has turned out to be one where there are presently living beings that can feel rather than having developed as a zombie world in which there would be no conscious experiences of any kind this book introduces the natural problem by relating it to central problems in the philosophy of mind metaphysical mind body problem hard problem of consciousness and emphasizing the distinctive interest of its diachronic dimension ranging from philosophy to biology and neuroscience it offers a thorough analysis aimed at better understanding what could explain why phenomenal consciousness has been preserved throughout evolution by natural selection this is an original engaging and thought provoking philosophical study of a neglected but fundamental question regarding the nature and origin of consciousness

A New Philosophy

2016-02-25

the transformation of consciousness in myth reflects the spectacle of our age with its changing ideas and values this work is an exploration of past myths and their relationship with our present personal and social mythologies as related through psychology as many of our present myths are becoming obsolete the author elaborates upon what will replace them human beings spiritual journeys and their purpose in the cosmos are discussed the theories of carl jung and joseph campbell are used to explain and clarify the transformation of consciousness that occurs in myth and to those persons who enter into the psychological journey of myth making a primary source for furthering personal and global transformation is the role of the feminine professor tigue seeks to clarify and deepen our understanding of jung s collective unconscious and archetypes his holistic approach of integrating mysticism spirituality myth and psychology is of particular value for the ardent seeker

Identity and Difference

2013-10-08

the life of john c lilly m d was the basis for the movie altered states his work was represented in day of the dolphin he invented the isolation tank and has written more than a dozen books now at age 74 he has decided to tell all a life of science drugs dolphins celebrities and radical spiritual transformation 14 pages of photographs

The Jesus Code

2000-02-01

the center of the cyclone is an autobiographical work authored by famed fringe scientist and psychedelic pioneer dr john c lilly this is his most well known book and his first mainstream work

setting the tone for his dual career as scientist and explorer of human consciousness in intimate detail lilly tells the story of how he left mainstream science to become an explorer of the far out places of the human mind using his own brain as a laboratory and utilizing every method of consciousness alteration at his disposal including lsd isolation tanks and zany new age encounter groups lilly takes us on his decades long quest to discover the true nature of consciousness and reality overturning many of his own assumptions and those of mainstream science along the way this 45th anniversary edition has new afterwords by lilly s friends and colleagues lee perry and adam trombly

The Natural Problem of Consciousness

2017-06-12

in books like embryogenesis and embryos galaxies and sentient beings author richard grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied the embryo is the universe writing itself on its own body in dark pool of light his latest creation grossinger weaves neuroscience based behaviorism and the phenomenology of being and reality together with psychological and psychospiritual views of that single thing which is most difficult to understand or vindicate our own existence in 2008 grossinger began studying with noted psychic teacher john friedlander who helped him refine his vision of cerebral and somatic awareness to still subtler levels dark pool of light began unnamed in the journals of my psychic work with john friedlander says grossinger not so much a record of actual practices as insights from them and extensions out of them an expansive inquiry into the nature of consciousness the series examines the tension between the scientific and philosophical and psychic views of the same phenomena and includes field notes and experiential exercises that invite the reader to make their own explorations dark pool of light is divided into three volumes which the author calls movements the allusion to music is apt for the book unfolds in a truly symphonic manner in volume 1 grossinger begins with the scientific and philosophical analytical views of reality exploring the science parascience philosophy and psychology of consciousness covering topics as diverse as current discoveries in neuroscience and the philosophy of the ancient greeks the book gives a broad overview of the bodies of knowledge concerning the nature of reality and consciousness

The Transformation of Consciousness in Myth

1994

we know that today we are divorced from nature to a degree that is threatening our existence we also know that those sensual animal qualities that characterized our existence when we were embedded soulfully in nature have departed and we long for their return we appear to be in a soul process of overcoming solidity and entering a new status of soul word in which the animal the sensual and the wild are indeed returning but at a totally new and unheard of level of complexity in consciousness from the introduction

John Lilly, So Far

1991

the book offers a novel view of consciousness and its place in second language learning using the established cognitive framework mogul it also provides an extensive review of theories of consciousness and related cognitive theory and research placing that work in the context of second language learning

An essay on Consciousness; or, a series of evidences of a distinct mind. The second edition enlarged

1812

despite recent strides in neuroscience and psychology that have deepened understanding of the brain consciousness remains one of the greatest philosophical and scientific puzzles the second edition of theories of consciousness an introduction and assessment provides a fresh and up to date introduction to a variety of approaches to consciousness and contributes to the current lively debate about the nature of consciousness and whether a scientific understanding of it is possible after an initial overview of the status and prospects of physicalism in the face of the problem of consciousness william seager explores key themes from descartes the founder of the modern problem of consciousness he then turns to the most important theories of consciousness identity theories and the generation problem higher order thought theories of consciousness self representational theories of consciousness daniel dennett s theory of consciousness attention based theories of consciousness representational theories of consciousness conscious intentionality panpsychism neutral monism thoroughly revised and expanded throughout this second edition includes new chapters on animal consciousness reflexive consciousness combinatorial forms of panpsychism and neutral monism as well as a significant new chapter on physicalism emergence and consciousness the book s broad scope depth of coverage and focus on key philosophical positions and arguments make it an indispensable text for those teaching or studying philosophy of mind and psychology it is also an excellent resource for those working in related fields such as cognitive science and the neuroscience of consciousness

Center of the Cyclone

2017-01-06

higher order ho theories of consciousness have in common the idea that what makes a mental state conscious is that it is the object of some kind of higher order representation this volume presents fourteen previously unpublished essays both defending and criticizing this approach to the problem of consciousness it is the first anthology devoted entirely to ho theories of consciousness there are several kinds of ho theory such as the hot higher order thought and hop higher order perception models and each is discussed and debated part one contains essays by authors who defend some form of ho theory part two includes papers by those who are critics of the ho approach some of the topics covered include animal consciousness misrepresentation the nature of pain subvocal speech subliminal perception blindsight the nature of emotion the difference between perception and thought first order versus higher order theories of consciousness and the relationship between nonconscious and conscious mentality series a
