100 Activities for Teaching Research Methods 2016-08-08 a sourcebook of exercises games scenarios and role plays this practical user friendly guide provides a complete and valuable resource for research methods tutors teachers and lecturers developed to complement and enhance existing course materials the 100 ready to use activities encourage innovative and engaging classroom practice in seven areas finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills each of the activities is divided into a section on tutor notes and student handouts tutor notes contain clear guidance about the purpose level and type of activity along with a range of discussion notes that signpost key issues and research insights important terms related activities and further reading suggestions are also included not only does the a4 format make the student handouts easy to photocopy they are also available to download and print directly from the book s companion website for easy distribution in class

57 SF Activities for Facilitators and Consultants 2008 facilitators and consultants from all over the world share their experience in this collection of solution focused activities for workshops and team events it helps readers to maximise the effectiveness of their workshops team meetings and projects use creative stimulating activities with confidence and precision

Play, Physical Activity and Public Health 2018-07-11 are children playing less than they used to are rising obesity rates linked to a decline in children s time to play freely these and other related questions have filled the pages of newspapers magazines and scholarly journals for the past decade researchers and journalists have attributed these issues to societal changes around children s lives and leisure the growth of structured and organised activities and increasing perceptions of risk in children s play play physical activity and public health presents a discussion of the way modern notions of play are rendering children s leisure activities less free and less engaged in simply for fun based on original qualitative research and analysis of contemporary media from canada and elsewhere this book argues that the

growing health concerns around childhood play entail a paradox by advocating promoting discussing and re directing children s play a new form of children s leisure is emerging one that is purpose driven instrumentalised for health and ultimately less free we explore how play has become goal oriented a means to health ends and how the management of pleasure in play as well as diverse risk discourses around play continue to limit and constrain possibilities for children and families to play and engage in leisure freely incorporating past critiques of this trend in play we argue for research and practice to create new possibilities and ways of thinking about children s play leisure fun and childhood that are less constrained and managed and importantly less geared towards health goals this is a valuable resource for students of the sociology of sport kinesiology sports and health psychology education public health and childhood studies it is also an important read for school teachers public health practitioners psychologists physical education teachers academics and parents interested in how children s leisure lives are being shaped by the growing and diverse discussions around play
