during the long eighteenth century europe s travelers scholars and intellectuals looked to asia in a spirit of puzzlement irony and openness in this panoramic and colorful book jürgen osterhammel tells the story of the european enlightenment s nuanced encounter with the great civilizations of the east from the ottoman empire and india to china and japan here is the acclaimed book that challenges the notion that europe s formative engagement with the non european world was invariably marred by an imperial gaze and presumptions of western superiority osterhammel shows how major figures such as leibniz voltaire gibbon and hegel took a keen interest in asian culture and history and introduces lesser known scientific travelers colonial administrators jesuit missionaries and adventurers who returned home from asia bearing manuscripts in many exotic languages huge collections of ethnographic data and stories that sometimes defied belief osterhammel brings the sights and sounds of this tumultuous age vividly to life from the salons of paris and the lecture halls of edinburgh to the deserts of arabia the steppes of siberia and the sumptuous courts of asian princes he demonstrates how europe discovered its own identity anew by measuring itself against its more senior continent and how it was only toward the end of this period that cruder forms of eurocentrism and condescension toward asia prevailed

Jürgen Moltmann is now regarded as one of the most influential theologians since Karl Barth. However, evangelical engagement with Moltmann has been hesitant and deficient. This book fills the gap: ten respected evangelical theologians engage with Moltmann's theology in a mature, dynamic, and critical manner, seeking to appropriate from it in a discerning manner. The contributors include Sung Wook Chung, Kurt Anders Richardson, Veli Matti Karkainen, Stephen N. Williams, and Timothy Bradshaw. This book is an excellent demonstration of intellectual confidence and respectability of robust evangelical theology.

This book critically investigates Jürgen Habermas's attempt to develop a communicative conception of human rationality. It explores Habermas's fundamental commitment to the practical import and ramifications of communicative rationality in the field of African political philosophy. Within this context, Habermas's ambitious project to reconcile law, justice, and democracy is wide-ranging. This work explores how it is, among other things, that deliberative institutions can become more democratic through, as Dewey put it, improvements in the methods and conditions of debate, discussion, and persuasion.

August Bebel (1840–1913) was one of the towering figures of late nineteenth century European socialism and the leading figure of the German labour movement from the 1860s until his death in 1913. Born into a modest family and a half orphan from the age of four, his advancement to a pivotal role in the politics of Imperial Germany mirrored the success of German social democracy. In this period, Bebel was not only the founder and first leader of the Social Democratic Workers Party of Germany (SDAP), a political movement that became the largest socialist party in nineteenth century Europe, but he was also a powerful orator and leading member of the German Parliament. He was described by contemporaries as the King of the German Workers and the Shadow Emperor of Germany. In this biography, Jürgen Schmidt situates Bebel's life and career in the political, social, and cultural history of modern Europe. He also provides an overview of the growth of the labour movement and working class political activism in late nineteenth century Germany. This is an essential biography of one of Germany's most influential and unique politicians living at a time of great political, social, and industrial change in Europe.

Hans Jürgen Syberberg is an original, the most controversial of all the new German directors, and a figure who has long been at the vanguard of the resurgence of experimental filmmaking in his homeland. Syberberg's most characteristic films examine recent German history: a documentary for example about Richard Wagner's daughter-in-law, who was a close friend of Hitler; the confessions of Winifred Wagner (1975); but especially historical is his trilogy covering one hundred years of Germany's past, including most famously Hitler (a film from Germany also known as Our Hitler, 1977).

in this film and other works syberberg unites fictional narrative and documentary footage in a style that is at once cinematic and theatrical mystical and magical hans jürgen syberberg the film director as critical thinker essays and interviews is the first edited book in english devoted to this director s work and includes his most important english language interviews as well as some of the best english language essays on his work in sum this book is a significant contribution not only to the study of syberberg s oeuvre but also to the study of german history and politics in the second half of the twentieth century

Europe still a collection of peoples that rallied together during good times and then retreat to nationalism when challenges appear or has Europe adopted a common identity that would foster solidarity during hard times this book provides its reader with a fresh perspective on the importance identity has on the functioning of the European Union as exemplified in Jürgen Habermas's seminal text *The Crisis of the European Union: A Response* rather than exploring the causes of the crisis the contributors examine the current state of European identity to determine the likelihood of implementing Habermas's suggestions the contributors' interdisciplinary approach is organized into four parts and examines the following key areas of concern Habermas's arguments placing them into their historical context to which degree do Europeans share the ideals Habermas describes as crucial to his program of reform influence of Habermas's cosmopolitanism through religious and literary lenses impact of Habermas's notions in the arenas of education national economies austerity and human rights Jürgen Habermas and the European economic crisis will be read by scholars in the fields of political theory and philosophy European politics and cultural studies

Jürgen Habermas is one of the foremost philosophers and social theorists in the world today but the complexity and breadth of his thought make him often difficult to understand in this book Stephen White offers a clear accessible and reliable introduction to Habermas's work particularly that which he has written since the publication of *Knowledge and Human Interests* produced in English in 1971 during this period new themes and directions have emerged in Habermas's thought which culminated in the theory of communicative action a massive work that has not hitherto been the subject of extended commentary and analysis this book is the first to provide a full length study of Habermas's mature thought locating the latter in the context of contemporary debates White explains Habermas's ideas about action rationality communicative ethics

contemporary capitalism and new social movements which characterize his later work he also examines habermas s interpretation of modernity showing that although like his forerunners in the frankfurt school habermas maintains a critical stance towards modernity s instrumentalization of reason he nonetheless offers a sophisticated defense of the universal significance of other aspects of modern consciousness that are too often forgotten by many recent radical critics of modernity throughout white presents habermas s work in such a way as to emphasize its coherence and to demonstrate how it constitutes the beginnings of a distinctive new research program in the social sciences as a well researched and lucid account of habermas s thought this book will appeal to readers wanting an introduction to the complexity of his ideas as well as to those already conversant with them it will also interest social and political theorists concerned with the general theoretical issues that it covers

Jürgen Habermas is arguably the world's most influential living philosopher by introducing ideas such as the public sphere, constitutional patriotism, and the discourse theory of law and democracy. He has transformed modern political philosophy, but since 2001 Habermas's thought has taken an unexpected turn. This book is the first full-length treatment of Habermas's postsecular political philosophy and critically analyses his new direction of thought. The author places the postsecular turn in the context of Habermas's long-standing commitment to developing a postmetaphysical account of morality, politics, and human communication. The tension between secular liberal democracy and religious freedom is real, but there may be losses as well as gains to Habermas's quest to translate the sacred.

In the 19th century, economic growth was accompanied by large-scale structural change known as industrialization, which fundamentally affected Western societies. Even though industrialization is on the wane in some advanced economies, we are experiencing substantial structural changes again. The causes and consequences of these changes are inextricably linked with earlier industrialization. This means that understanding 19th-century industrialization helps us understand problems of contemporary economic growth. There is no recent study on economic developments in 19th-century Germany, so this concise volume, written specifically with students of German and economic history in mind, will prove to be most valuable, not least because of its wealth of statistical data.
