resource management is the process of identifying requirements matching resources to applications allocating those resources and scheduling and monitoring grid resources over time in order to run grid applications as efficiently as possible while grids have become almost commonplace the use of good grid resource management tools is far from ubiquitous because of the many open issues of the field including the multiple layers of schedulers the lack of control over resources the fact that resources are shared and that users and administrators have conflicting

There is a popular notion that the Italian armed forces of the Second World War were an inferior fighting force despite the vast numbers taken prisoner. Detailed studies of the experiences of these soldiers remain relatively uncommon, and the value of this group to furthering our understanding of the Italian experience of war under fascism is also rarely acknowledged. The existence in the National Archives of hundreds of pages of transcripts of covert British surveillance of Italian POWs has made it possible to engage with their experiences and opinions in much greater depth than the

euphemistically termed special reports present historians with a unique insight into how all levels of italian soldiery viewed fascist italy s experience of war 1940 1943 this book examines reactions to italian political leadership the progress of the war as well as italian soldiers everyday views on sex war the enemy death food their allies bravery race and killing these fascinating documents reveal the complexity of the outlook of these men which persistent and influential national stereotypes and historiographical trends fail to acknowledge
