**FANON TODAY** 2021-08-07 the cia through the good offices of the government of tunisia escorted frantz fanon to the united states he arrived at idlewild airport now jfk at the end of october 1961 my wife can attest how reluctant i was to come here according to mrs fanon at the time they believed that the best medical facilities were in the united states it was under these circumstances that he came to the u s however you should note that he did not come here of his own accord in fact he was not in favor of this solution as a black man a militant and an anti imperialist revolutionary fighter he was not comfortable going to the united states but really he had no choice he was very ill in fact he was dying josie fanon frantz fanon says that in blida i saw how terrified the settlers became once the natives started to use guns against them it was traumatic for the first time they gave the native a second look the native had become a human being the game was clearly up the native had ceased to be acquiescent to colonialism's credo and european domination as he had ceased to be a thing a native with a gun is cause for ontological fear in the settlers community a prey that turns against a hunter is an awe inspiring creature he is no longer a colonized man catharsized he is a native who now respects himself with an eagerness as bright as the algerian sunshine they re no longer on our side a settler told me they re fighting to be independent we thought they wanted us here what can they do without us such fears often cause psychotic breaks with reality suddenly settlers question the ethics of colonialism what's the explanation for this pathology discovering that the native has become a freedom fighter instead of a passive serf after so many years of european authority is an irretrievable shock for the settler the algerian slogan a suitcase or a coffin sent shockwaves through the settler communities some committed suicide such was the astonishment at not only losing their sense of superiority but at the distinct possibility that the natives were about to do to them what they had done to the natives i explained to those who came to the hospital that the natives were not interested in revenge they were beyond that hatred wasn't the idea they just wanted their humanity back this was a revolution anti colonialism is the humanism of the 20th century the ideal epilogue to the narrative of fanon in the u s is an interview the author conducted with his friend josie fanon the wife of the legendary humanist anti colonialist

[Toward the African Revolution](#) 1968-10 frantz fanon's explosive *black skin white masks* is a merciless exposé of the psychological damage done by colonial rule across the world using fanon's incisive analytical abilities to expose the consequences of colonialism on the psyches

of colonized peoples it is both a crucial text in post colonial theory and a lesson in the power of analytical skills to reveal the realities that hide beneath the surface of things fanon was himself part of a colonized nation martinique and grew up with the values and beliefs of french culture imposed upon him while remaining relegated to an inferior status in society qualifying as a psychiatrist in france before working in algeria a french colony subject to brutal repression his own experiences granted him a sharp insight into the psychological problems associated with colonial rule like any good analytical thinker fanon s particular skill was in breaking things down and joining dots his analysis of colonial rule exposed its implicit assumptions and how they were replicated in colonised populations allowing fanon to unpick the hidden reasons behind his own conflicted psychological make up and those of his patients unflinchingly clear sighted in doing so black skin white masks remains a shocking read today
