Transforming US Army Supply Chains 2011-03-15

this text offers a practical approach for understanding the us army s extremely complex global logistics system widely acknowledged as one of the largest in the world the focus is on inventory management policy

where prescriptions are illuminated through the prism of an enterprise supply chain analysis although army aviation logistics examples are emphasized throughout the fundamental issues and potential solutions are broadly applicable to other large scale military and industrial supply chains as well following a summary of recent trends for background and context a multi stage conceptual model of the logistics structure is presented to segment and guide the effort this multi stage model is used to systematically analyze major organizational components of the supply chain diagnose structural disorders and prescribe solutions integration challenges are addressed using cost benefit perspectives which incorporate supply chain objectives of efficiency resilience and effectiveness the design and evaluation section proposes an analytical architecture consisting of four complementary modeling approaches collectively referred to as dynamic strategic logistics planning to enable a coordinated enterprise approach for army logistics transformation an organizational construct is presented for an engine for innovation to accelerate and sustain continual improvement for army logistics and supply chain management a center for innovation in logistics systems finally strategic management challenges associated with enterprise integration and transformational change are addressed organizational design management information and decision support systems strategic alignment for a learning organization and workforce considerations including human capital investment needs the text concludes with a relevant historical vignette and closes with a summary of expected benefits

ERP Adoption in Organizations 2022-09-13

this book examines the factors that shape the adoption and continuous usage of new technology by employees in organizations while within an organization new technology adoption has evolved from its traditional role to a more strategic one the appropriate adoption of new technology can only add value to organizations identifying the factors that influence this adoption process is crucial for successful adoption of new technology in organizations the study presented in this book focuses on individual organizational social and industrial factors and uses those to offer a comprehensive model of enterprise resource planning erp application adoption it contributes towards understanding employees acceptance and adoption of enterprise level technological innovation allowing organizations to create a work environment conducive to individual implementation and acceptance of new technology it appeals to researchers interested in studying the adoption of erp and other innovative technologies in organizations

Information Technology in Vietnam (and Southeast Asia): Discussion

Cases 2014

over the past decade vietnam has become a major player in the rapidly growing region of southeast asia anyone who has visited the country has sensed the extraordinary energy of its commercial activities few outsiders however have been granted access to the individual decision making processes that have driven this rapid development with the publication of this book that situation has changed the ten discussion cases included in the collection examine important choices facing vietnamese decision makers in a broad range of contexts examples of these contexts include a locally developed erp considers how to compete with much larger international players a coffee shop examines how it might be harnessed to address employee theft a burgeoning ecommerce site that leads in book sales wonders what it should sell next an it manager tries to decide whether or not to risk failure by accepting a promotion to a new level a textile manufacturer seeks to use it to more effectively manage production a local investment company attempts to redesign its portal and the list goes on and even includes one entry from vietnam s neighbor thailand the ten case studies provided in this book are all open authentic discussion cases what makes them open is that none of them have a right answer although each has strong and weak responses to the situation described they are authentic because each has been meticulously researched by its authors and with the exception of some of the names which have been disguised they describe an actual situation faced by the key decision maker most importantly what makes them discussion cases is the fact that they are specifically optimized for use as a basis for discussion in the classroom the teaching technique known as the case method

ERP: The Implementation Cycle 2017-07-05

the erp implementation cycle is characterized by complexity uncertainty and a long timescale it is about people and issues that affect the business it is a multi disciplinary effort this book will provide you with the practical information you will need in relation to the many issues and events within the implementation cycle after reading this book you will be fully equipped and alerted to what is involved in an erp implementation erp enterprise resource planning can be described as an integrated enterprise wide information system as well as handling many of the transactions found within a business it has the potential for meeting many of the information requirements of busy personnel if used in the right hands it may provide the business with a competitive edge much can go wrong during the implementation since there are many issues to deal with from the content of this book you will gain an understanding of what can go wrong you will be prepared in advance and will be equipped to take preventative steps to smooth the progress of implementation this book covers the multidisciplinary subject of erp implementation looks at a range of relevant topics including erp market place development vendor selection project management

process design and post go-live improvements reveals a range of issues which an implementer should be alert to right at the outset before the go-ahead is given to proceed with an implementation. Features material on vendor selection, project management, training, business process re-engineering, BPR and continuous improvement.

Driving Growth and Shareholder Value 2006

This book develops a broad range of knowledge in ERP implementation and usage for textile and apparel vertical. Covered are two major areas in ERP: the basics about ERP and the technology and functioning of it and usage of ERP for textile and apparel vertical. Specifically also addressed are concerns of the industry mainly on how to select the ERP, what to expect from ERP and how it will be beneficial to the industry.

ERP for Textiles and Apparel Industry 2016-02-24

2013 Annual Report of the U.S. Hospital IT Market Description
1. Most trusted hospital IT industry report
2. Analysis on the penetration of IT applications in the hospital industry
3. Information gathered from more than 4200 US hospitals with more than 100 IT applications
Other analysis and research details available in this text are:
1. Hospital IT industry overview
2. Health information management environments details
3. Nursing application environment details
4. Human resources information related to hospital IT etc.

2013 Annual Report of the U.S. Hospital IT Market 2013

This open access book is based on Spationomy, spatial exploration of economic data, an interdisciplinary and international project in the frame of Erasmus funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics for the newly introduced courses. Interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making. In a broader sense, the chapters will present the methodological background of the project, give case studies and show how visualisation and the simulation game works.
