give your business the chance to be one of those that make it mullins has hit the nail on the head the new business road test for the first time successfully defines the starting point for a business he delivers a clear and concise road map for anyone wondering whether they have a good business idea and what to do about it i wish it had been given to every entrepreneur who appeared before me on dragon s den doug richard dragon on dragon s den mullins new business road test provides the entrepreneurial equivalent to the proverbial sleeping policeman on the sunday drive the necessary jolt of reality for those hanging on to the belief that value is created on a computer spreadsheet or a fancy powerpoint presentation the business plan is the road map between idea

and sustainable business and John offers the most valuable journey planner available. Benoit Leleux, professor of entrepreneurship finance at IMD, Lausanne, Switzerland, works with hundreds of CEOs reviewing their investor pitches. The truth is that all businesses, even those already funded, can improve their business models and their road show presentation to investors or strategic partners. Good entrepreneurs understand that their emerging business remains work in progress, even on the road. They work the map we recommend that all new entrepreneurs look at John's excellent new business road maps before hitting the ground. William Stevens, Entrepreneur Unlimited, got an idea for a new business, took it for a road test to make sure it works before investing valuable time and money in it. Most new businesses fail, why? Because no matter how talented you are, no matter how much capital you have, no matter how good your business plan is, if you're pursuing a lousy business, a fundamentally flawed opportunity, you're on the fast track to failure. The new edition of this best-selling book will help you to road test your idea, making sure that the business you build is based on a winning concept. It will enable you to invest your time and money wisely and pitch to investors and customers with confidence. No budding entrepreneur should leave the day job or face an investor without having read this book.

ozawa ichirō was the axis on which japanese politics turned for more than two decades he helped to reshape the electoral system political funding rules the evolution of the party system the nature of executive government the roles and powers of bureaucrats and the conduct of parliamentary and policymaking processes admired and reviled in almost equal measure ozawa has been the most debated and yet least understood politician in japan with little agreement to be found amongst the many who have debated his patent political assets and palpable political flaws this book examines the political goals behaviour methods and practices of ozawa ichirō and in doing so provides fascinating insights into the inner workings of japanese politics it explores ozawa s paradoxical and conflicting contributions in terms of two contrasting models of old and new politics indeed therein lies the problem of understanding the real ozawa he remained a practitioner of old politics despite his rhetorical agenda of change to bring about new politics in seeking to unravel the ozawa enigma aurelia george mulgan reveals his primary motivations to establish whether he sought power primarily to enact reforms or whether his reform goals simply disguised power seeking objectives this volume seeks to illuminate ozawa s true character as a politician and untangle the complex elements of old and new politics that he represents through an in depth study of

ozawa and his political activities this book shows how the japanese political system works at the micro level of individual politicians political relationships and systems as such it will be of huge interest to students and scholars of japanese politics asian politics and political systems

communication is vital for social participation however communication often takes place under suboptimal conditions this makes communication harder and less reliable leading at worst to social isolation in order to promote participation it is necessary to understand the mechanisms underlying communication in different situations human communication is often speech based either oral or written but may also involve gesture either accompanying speech or in the form of sign language for communication to be achieved a signal generated by one person has to be perceived by another person attended to comprehended and responded to this process may be hindered by adverse conditions including factors that may be internal to the sender e g incomplete or idiosyncratic language production occur during transmission e g background noise or signal processing or be internal to the receiver e g poor grasp of the language or sensory impairment the extent to which these factors

interact to generate adverse conditions may differ across the lifespan recent work has shown that successful speech communication under adverse conditions is associated with good cognitive capacity including efficient working memory and executive abilities such as updating and inhibition further frontoparietal networks associated with working memory and executive function have been shown to be activated to a greater degree when it is harder to achieve speech comprehension to date less work has focused on sign language communication under adverse conditions or the role of gestures accompanying speech communication under adverse conditions it has been proposed that the role of working memory in communication under such conditions is to keep fragments of an incomplete signal in mind updating them as appropriate and inhibiting irrelevant information until an adequate match can be achieved with lexical and semantic representations held in long term memory recent models of working memory highlight an episodic buffer whose role is the multimodal integration of information from the senses and long term memory it is likely that the episodic buffer plays a key role in communication under adverse conditions the aim of this research topic is to draw together multiple perspectives on communication under adverse conditions including empirical and theoretical approaches this will facilitate a scientific exchange among individual scientists and groups studying different aspects of communication under adverse conditions and or the role of cognition in communication as such this topic belongs firmly within the field of cognitive hearing

science exchange of ideas among scientists with different perspectives on these issues will allow researchers to identify and highlight the way in which different internal and external factors interact to make communication in different modalities more or less successful across the lifespan such exchange is the forerunner of broader dissemination of results which ultimately may make it possible to take measures to reduce adverse conditions thus facilitating communication such measures might be implemented in relation to the built environment the design of hearing aids and public awareness

introductory textbooks on american government tell us that the supreme court is independent from the elected branches and that independent courts better protect rights than their more deferential counterparts but are these facts or myths in this groundbreaking new work anna harvey reports evidence showing that the supreme court is in fact extraordinarily deferential to congressional preferences in its constitutional rulings analyzing cross national evidence harvey also finds that the rights protections we enjoy in the united states appear to be largely due to the fact that we do not have an independent supreme court in fact we would likely have even greater protections for political and economic rights were we to prohibit our federal courts from exercising judicial review altogether harvey s findings suggest that constitutional designers would be wise to heed thomas jefferson s advice to let mercy be the character of the law giver but let the judge be a mere machine rdquo
