essay from the year 2016 in the subject sociology war and peace military grade freshman the university of montana course writ 101 language english abstract in this paper we will explore the social cultural religious and even genetic influences that drive the warrior culture and mindset by blending historical examples research papers and my own personal experience i hope to shed some light on the question why do we fight it is well known that all great empires were built on the backs of men and women who were willing to fight and die for someone else the romans the mongolians even the united states of america all rose to power because they had large armies full of strong warriors what is it that makes these people warriors what can lead someone to cast aside safety and security leave their friends and family behind and lead a life that will almost certainly end violently as a united states army veteran of both the afghan and iraqi wars this is a subject that has always intrigued me when you are thousands of miles from home fighting an enemy you know very little about you begin to wonder how did i get here imagine if you will that instead of heading off to college or starting an entry level job the first time you left home you flew to a military base had a rifle put in your hands and had extremely dangerous people teach you how to kill with it instead of studying for exams you study combat manuals instead of going on spring break you go to a war zone what the hell would make someone do such a thing

excerpt from war and policy essays when i was a boy my father partly by precept but much more by example taught me three lessons to tell the truth not to be afraid of saying what i thought and to live for the public good the public good in those days was in charge of the liberal party and the ideal public man whom i was brought up to revere was john bright in 1874 i happened to read an austrian statistical pamphlet comparing the strength of the various european armies it seemed to me remarkable that the british army should be only about a tenth of the size of the army kept by a continental state of the same population this was a fact of which it seemed desirable to get to know the explanation but statistics though they suggest questions seldom give the answers they require to be interpreted an army is an instrument for war and it was therefore necessary for my purpose to find out the meaning and nature of war the investigation cost me many years of labour about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
