the classical dynamics of particles galilean and lorentz relativity has been designed to serve either as an independent graduate course in dynamics or as a segment of a graduate theoretical physics course the book begins with a general introduction and a rather extensive discussion of the special theory of relativity including a section on tachyons separate chapters follow on the variational derivation of lagrangian dynamical equations of charged particle motion and spin angular momentum variational derivation of noether s theorem and canonical formalism and dirac s extension of hamiltonian dynamics and treatment of constraints the no interaction theorem of wigner and van dam and various efforts to construct a many particle dynamics compatible with the special theory of relativity are also discussed the final chapter presents two applications of group theory in classical mechanics the factorization of the dynamical matrix and the construction of a canonical formalism from a symmetry group this text is intended for advanced undergraduate or graduate students of physics it is assumed that the reader has had an undergraduate course in mechanics and the usual undergraduate mathematics preparation including differential equations and matrix theory some exposure to elementary tensors and group theory would be helpful but is not essential

in transcending textuality ariadna garcía bryce provides a fresh look at post trent political culture and francisco de quevedo s place within it by examining his works in relation to two potentially rival means of transmitting authority spectacle and print quevedo s highly theatrical conceptions of power are identified with court ceremony devotional ritual monarchical and spiritual imagery and religious and classical oratory at the same time his investment in physical and emotional display is shown to be fraught with concern about the decline of body centered modes of propagating authority in the increasingly impersonalized world of print transcending textuality shows that quevedo s poetics are in great measure defined by the attempt to retain in writing the qualities of live physical display

this is an important collection and starting point for the worthy goal of promoting a better understanding of the past that makes it less able to be manipulated for contemporary political and religious aims compiled out of the european past its aim of a better understanding of traditional values ought to be useful for contemporary cultures and for the work of scholars of all cultures and continents renaissance quarterly in the last decade or so many books have been devoted to the history of europe two conceptual axes predominate in a large number of these accounts a discourse focusing on europe s values and another discourse fashioned largely in opposition to the first which emphasizes the process of european construction the first conceives of europe s past teleologically as a process by which certain values christian ethics individualism capitalism tolerance republicanism due process etc were affirmed and came to define european culture the second approach rejects the discourse on values emphasizes the post enlightenment emergence of the concept of europe and the political and ideological implications in its continuous redefinitions and re elaborations during the past two or more centuries this volume offers new approaches that integrate the long temporal dimension of the values based

approach albeit devoid of its teleological element with the constructivist interpretation

el futuro de la comunicaci n y del periodismo est en la red sea cual sea la tecnolog a que vaya adoptando esa red se presenta diversas aproximaciones que tratan cuestiones que van desde las bases de nuestra sociedad digital o el papel de lo digital en la historia global del periodismo pasando por las nuevas capacidades y habilidades que necesita el profesional de la informaci n a la hora de enfrentarse a este dominio tan cambiante sin desde ar la relevancia de aspectos como las formas de organizaci n tratamiento visualizaci n y dise o en los medios digitales las implicaciones del hipertexto y los g neros en los nuevos medios el uso de las fuentes de informaci n los modos y formatos del nuevo periodismo la radio y la televisi n en internet as como con otras cuestiones b sicas y que en ocasiones no son tratadas en los textos al uso como son la audiencia y la propiedad intelectual en el contexto electr nico

#### History for Ready Reference: Tunnage-Zyp and Supplement

1895

from 12 april to 14 april 1988 120 of gerard and antoinette de vaucouleurs s friends and colleagues gathered at the institut d astrophysique in paris to cel ebrate gerard s 70th birthday

and his remarkable career in astronomy the gathering also honored the memory of antoinette who died 29 august 1987 after a long illness and her own no less remarkable career this volume collects the 24 invited review papers and the 60 contributed poster papers presented at the meeting gerard de vaucouleurs gerard de vaucouleurs was born on 25 april 1918 in paris where he spent his boyhood he became an active amateur astronomer in the early 1930 s making extensive observations of mars jupiter and variable stars including the bright supernova of 1937 in ic 4182 he also began life long interests in astronomical photography and galaxy cataloguing during this period in 1939 he met the director of the paris transport system and an equally avid amateur astronomer julien peridier de vaucouleurs worked at peridier s private observatory at le houga in southwestern france on and off throughout the next decade his undergraduate work was in mathematics astronomy and experimental physics this combined with his interest in observational astronomy formed his life long empirical approach to science after spending 18 months in the french army early in 1939 41 gerard returned to the peridier observatory and then in 1943 to his studies at the sorbonne where he met antoinette
