the transport committee reports that extensive cuts to rural evening and weekend bus

services are damaging the ability of many people especially the old young or disabled to participate in employment education or voluntary work and to access vital services such as healthcare and retail facilities in a review of england s bus services outside london after the spending review the committee warns that even deeper cuts in bus services are likely in 2012 13 as local authorities struggle to deal with budgetary reductions and calls for the concessionary travel scheme to be preserved so that the elderly and disabled continue to enjoy free bus travel the committee also concludes that the concessionary fares scheme was discriminatory because it did not apply to most community transport providers usually independent charities that provide transport such as dial a ride bus services it calls on the department for transport to monitor the extent of service cutbacks made this year and to review service provision again after bsog bus service operator grant grant cuts take effect in 2012 13 so that it can analyse and draw conclusions about the wider costs and benefits of its policy changes to the country as a whole the local government association should identify and disseminate information about good and bad practice in the delivery of cost effective flexible services including community transport and or area based transport integration and local authorities and commercial operators must consult more widely where services are being changed

in a cultural climate saturated by technology marketing professionals have focused their energies on creating newer and more digital methods of advertising their brands with the fear that if they don't embrace big data they will fade into obscurity but Tom Doctoroff, Asia CEO for J. Walter Thompson, argues that this frenzy over digital and social media has created a schism in the marketing world that is hindering brands from attaining their true business potential. The tension between traditional branding and the seemingly unlimited possibilities presented by the advent of digital branding leads companies to abandon the tried and true aspects of marketing for the flash of the new. In Twitter is not a strategy, Doctoroff explains why a strategy that truly integrates the two ideas is the best way for a brand to move into the future. Using some of the biggest brand names in the world as examples such as Coca-Cola, Nike, and Apple, he breaks down the framework of marketing to explain how digital marketing can't stand without the traditional foundation.
