the whole history of literary criticism is illuminated by this analysis of one english critic's work it is in effect a literary case study presented as partial answer to the complicated question what cultural conditions are conducive to the development of a particular theory of literature initially lee andrew elioseff defines four difficult responsibilities of the historian of criticism the interpretation of his material in terms of all the cultural circumstances that produced it elimination of the purely chance

elements such as private feuds and unimportant personal tastes consideration of those aspects of criticism that best indicate the dominant critical opinions of the age and the principles that are leading it and illumination of the present critical situation concentrating upon the first three of these obligations elioseff seeks the sources of modern literary criticism in the works of joseph addison and his contemporaries analyzing with great care and accuracy their responses to problems both literary and nonliterary in their culture from the analysis addison emerges as a very significant figure a critic who moved from renaissance and neoclassical humanism and became one of the most important predecessors of romantic criticism a formulator of what was to become the emotive strain in literary criticism an essayist who raised many problems shared by the modern psychological critic whose immediate concern is the effect of the literature upon its audience drawing abundantly from a wide knowledge of philosophy literature and history and exercising an incisive critical acumen elioseff discusses addison s criticism in three aspects the critical milieu an interpretation of addison s relation to his age as it influenced his views on tragedy epic poetry and ballads addison and eighteenth century england a consideration of contemporary political thought morals and theology and the empirical tradition an analysis of addison s critical views as expressed in the pleasures of the imagination
