this book is a treatise on vigilance compliance and anti corruption it is based on empirical and realistic approach to the subject with some interpretations from ancient wisdoms the book will be of interest to bureaucrats and senior managers in government public and private sectors and to political practitioners and policy makers vigilance is founded on the premise that honesty is the best policy but at times it appears counter intuitive and not borne out from the real life experiences if vigilance were so easy to comprehend and unconditionally acceptable then perhaps there would have been no need to teach vigilance or write any book on it it would have been instinctive all of us would have just followed the dogma there are four types of corruption 1 tribute 2 coercive corruption 3 collusive corruption 4 mass indoctrination vigilance authorities concentrate on curbing tributes and coercive corruptions but collusive corruptions and mass indoctrinations are far more lethal and damaging the book emphasizes

on these two later forms of corruption
