Interfaces in Multilingualism 2013-11-12 dispelling our most cherished myths about work family balance suzanne venker argues in the two income trap that women who want to get married and have children will find their home lives less chaotic and far more satisfying by making motherhood not career their primary focus the premise of the two income trap why parents are choosing to stay home is that childrearing is no longer recognized for the enormous undertaking it is having it all is an impossible goal for anyone male or female the needs of children don't allow two married parents the freedom to dedicate themselves fully to something else its time to shift our paradigm there is value in pursuing both work and family but prioritizing family over career and being realistic with ones goals is the only way women can be successful at both the two income trap does two things helps elevates the status of parents at home and helps mothers who want to be employed create a life that works

Resources in Education 1802 the classic historical interpretation of the late nineteenth and early twentieth centuries in america sees this period as a political search for order by the middle class culminating in progressive era reforms in the middle class city john hepp examines transformations in everyday middle class life in philadelphia between 1876 and 1926 to discover the cultural roots of this search for order by looking at complex relationships among members of that city's middle class and three largely bourgeois commercial institutions newspapers department stores and railroads hepp finds that the men and women of the middle class consistently reordered their world along rational lines according to hepp this period was rife with evidence of creative reorganization that served to mold middle class life the department store was more than just an expanded dry goods emporium it was a middle class haven of order in the heart of a frenetic city an entirely new way of organizing merchandise for sale redesigned newspapers brought well ordered news and entertainment to middle class homes and also carried retail advertisements to entice consumers downtown via train and streetcar the complex interiors of urban railroad stations reflected a rationalization of space and rail schedules embodied the modernized specialization of standard time in his fascinating investigation of similar patterns of behavior among commercial institutions hepp exposes an important intersection between the

histories of the city and the middle class in his careful reconstruction of this now vanished culture hepp examines a wide variety of sources including diaries and memoirs left by middle class women and men of the region following philadelphians as they rode trains and trolleys read newspapers and shopped at department stores he uses their accounts as individualized guidebooks to middle class life in the metropolis and through a creative use of photographs floor plans maps and material culture the middle class city helps to reconstruct the physical settings of these enterprises and recreate everyday middle class life shedding new light on an underanalyzed historical group and the cultural history of twentieth century america

A Dictionary of the English and German, and the German and English Language 1798

The New and Complete Dictionary of the German and English Languages 1852 the oxford history of the novel in english is a twelve volume series presenting a comprehensive global and up to date history of english language prose fiction written by a large international team of scholars the series is concerned with novels as a whole not just the literary novel and each volume includes chapters on the processes of production distribution and reception and on popular fiction and the fictional sub genres as well as outlining the work of major novelists movements and tendencies this book offers an account of us fiction during a period demarcated by two traumatic moments the eve of the entry of the united states into the second world war and the onset of the covid 19 pandemic the aftermath of the second world war was arguably the high point of us nationalism but in the years that followed us writers would increasingly explore the possibility that us democracy was a failure both at home and abroad for so many of the writers whose work this volume explores the idea of nation became suspect as did the idea of national literature as the foundation for us writing looking at post 1940s writing the literary historian might well chart a movement within literary cultures away from nationalism and toward what we would call cosmopolitanism a perspective that fosters conversations between the occupants of different cultural spaces and that regards difference as an opportunity to be embraced rather than a problem to be solved during this period the novel has had significant competition for the us public s attention from other forms of narrative and media film television comic books videogames and the internet and the various forms of social media that it spawned if however the novel

becomes a residual form during this period it is by no means archaic the novel has been reinvigorated over the past eighty years by its encounters with both emergent forms such as film television comic books and digital media and the emergent voices typically associated with multiculturalism in the united states
