ability to draw from the deep historical background of cataloging theory to illuminate the potentials of library data on the helped win her the 2011 alcts outstanding publication award here she persuasively argues that to more effectively connect library users with books movies music computer games and other resources library data needs to move beyond frbr towards a more integrative approach to bibliographic models but doing so requires fundamental changes in the approach to library data combing a sweeping perspective with a critical eye she assesses how we define a work in the bibliographic world showing how bibliographic models reflect technology and our assumed goals of libraries she points the way ahead for catalogers and metadata specialists providing clear explanations and analysis on such topics as library data models and their connection to technology from early printing to relational databases and the semantic ideas and influence of leading thinkers such lubetsky wilson and tillet along with lesser known theorists like tanaguchi ifla meetings that led to the frbr study group including its original charge and final report frbr as a conceptual model and how that differs from data models the frbr document s flawed entity relationship model and how it overlooks user needs efforts to define a work as a meaningful creative unit separate from the physical package detailed analysis of the frbr entities and implementations of frbr both inside and outside the library community coyle s articulate treatment of the issues at hand helps bridge the divide between traditional cataloging practice and the algorithmic metadata approach making this book an important resource for both lis students and practitioners a practical and popular guide to operating a successful condominium association in florida working tool with forms and references to the latest florida statutes for officers owners realtors attorneys and directors a helpful and practical tool headed by the slogan design thinking a debate has unfolded over the last ten years about design methods which goes far beyond the specialist boundaries of design disciplines executives and business owners today recognize the potential for economic innovation lying in the creative and analytical mindset of designers the extensive literature available on design thinking focuses on the methodology of the design process while the conditions necessary to spark innovation processes in the first place have long remained more or less unnoticed driving desired futures starts here and asks how established innovations arise from a simple idea what criteria are mostly likely to be the basis from which the ideas of an individual can take hold in a social system what are conditions under which they can become incorporated into a diverse group of people what topics induce managers to choose and then to invest in a specific idea questions such as these are pursued in international contributions by renowned experts using the first digital camera as a case study they identify the individual and social processes associated with the exchange and implementation of new ideas previous
