this is a public announcement to inform america of a new not to be ignored women s club well not really a new club because it has been around for as long as women have been taking care of business families and of course each other the m club is the ultimate how to manual for any mature woman who is plain sick and tired of going unrecognized and being mistreated or simply for those who want to revel in their m ness o we are sick and tired mostly tired of things in general going to hell in a handbasket o we are intelligent savvy women who know right from wrong o sometimes we have to come over there to help another member

often we go over there in a big group so we can make an impression o we help other m club members because we want to and we are able next time and there will be a next time any woman is feeling overlooked or harangued she can appeal to her sister members of the m club to shift perspectives take the reigns and well take care of business women will love to give this incredibly funny and frank manual as a present or even keep it around the home or office for their own reference and fun

this is a foreword by an archaeologist not a conservator but as brad rodgers says conservation has been steadily pulled from archaeology by the forces of specialization p 3 andhewantstoremedythatssituationthroughthismanual he seesthisworkasa calltoactionforthenon professionalconservator permitting curators conservators and archaeologists to identify artifacts that need prof sional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 it is the mission of brad s manual to bring conservation back into arch ology p 6 the degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what brad has to say because as he says the conservationist archaeologist is responsible to make preparation for an artifact s care even before it is excavated and after its

storage into the foreseeable future a tremendous responsibility p 10 the manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when i first faced that archaeological challenge at colonial brunswick town north carolina in 1958 a challenge still being faced by archaeologists today the stage of conservation in 1958 is in dramatic contrast to the procedures brad describes in this manual conservation has indeed made great progress for instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe
