this book is the second in a brand new revealing series of the new and fully proven 5 dimensional quantum physical universe the big bang physics and philosophy are

now completely disproved by the particle accelerator in the absence of alleged particles the universe has now been proven by scientists and by the particle accelerator down there in cern this evidence points only in one direction towards a universe consisting only of energetic oscillating fields and a most strange matter and absolutely no form of physical particles this book is a sequel to rediscovering the fifth dimension these two books will explain you the entire new 5 dimensional quantum physical universe consisting only of energetic oscillating fields and a very wondrous substance together it adds up absolutely everything that we can see discover and detect the very active universal engine room the place where absolutely everything of physical actions unfolds consists of 5 very active dimensions outside there is what you might call quiet only the deep mysteries of quantum physics can give you the answer to the remaining dimensions besides all of the active physical actions that only take place in the very active engine room are quantum physical actions it is only these 5 quantum physical dimensions that are actually the active universal engine room and it is only the two outers of these 5 dimensions that are the driving force of the 5 dimensional very active quantum physical universe the two most exciting dimensions in the active engine room are the 5th and the 4th dimensions therein we find just the right quantum physics and these two books will convince you of that they just need to be read and understood the books will explain to you about the real creation of the universe and will explain to you the real inflation and how it develops the new expansion law will be explained something that drives inflation and expansion in the universe universal gravity is explained in the first and fundamental book along with how gravity creates and powers this quantum physical universe you will be explained how and what atoms basically are along with the higgs fields the higgs fields are very special because the matter is very special in this quantum physical universe in which there are no forms of 100 physical particles whatsoever a totally particle less universe with only energetic oscillating fields and the matter from all the higgs fields
