Indian Feminist Ecocriticism 2022-08-08 following françoise d eaubonne s creation of the term ecofeminism in 1974 scholars around the world have explored ways that the degradation of the environment and the subjugation of women are linked in the nearly three decades since the publication of the classical work ecofeminism by maria mies and vandana shiva in 1993 several collections have appeared that apply ecofeminism to literary criticism also known as feminist ecocriticism the most recent of these include anthologies that emphasize international perspectives furthering the comparative task launched by mies and shiva to date however there have been no books devoted to gaining a broad based understanding of feminist ecocriticism in india understood in its own terms our new volume indian feminist ecocriticism offers a survey of literature as seen through an ecofeminist lens by indian scholars which places contemporary literary analysis through a sampling of its diverse languages and in the context of millennia old mythic traditions of india

Fundamental Principles of Radar 2019-05-15 the important and fascinating topics of radar enjoy an extensive audience in industry and government but deserve more attention in undergraduate education to better prepare graduating engineers to meet the demands of modern mankind radar is not only one of the major applications of electronics and electromagnetic communications but it is also a mature scientific discipline with significant theoretical and mathematical foundations that warrant an intellectual and educational challenge fundamental principles of radar is a textbook providing a first exposure to radar principles it provides a broad concept underlying the basic principle of operations of most existing radar systems and maintains a good balance of mathematical rigor to convince readers without losing interest the book provides an extensive exposition of the techniques currently being used for radar system design analysis and evaluation it presents a comprehensive set of radar principles including all features of modern radar applications with their underlying derivations using simple mathematics coverage is limited to the main concepts of radar in order to present them in a systematic and organized fashion topics are treated not as abstruse and esoteric to the point of incomprehensibility but the very complex and rich technology of radar is distilled into its fundamentals the author s emphasis is on clarity without sacrificing rigor and completeness thus making the book broad enough to satisfy a variety of backgrounds and interests thorough documentation

provides an unusual degree of completeness for a textbook at this level with interesting and sometimes thought provoking content to make the subject even more appealing key features covers a wide range of topics in radar systems includes examples and exercises to reinforce the concepts presented and explain their applications provides self contained chapters useful for readers seeking selective topics provides broad concepts underlying the basic principles of operations of most types of radars in use today includes documentation to lead to further reading of interesting concepts and applications

Handbook Of Terrorism In The Middle East 2022-07-13 in the middle east the world s deadliest organizations the islamic state and al qaeda have firmly established their presence in the levant and the gulf in parallel state sponsored shia threat networks groups and cells notably the lebanese hezbollah and houthis operate throughout the middle east and beyond exploiting the conflict zones and their cascading ideologies both the sunni and shia threat entities compete to advance their own interests their parent and affiliate entities recruit and radicalise both territorial and diaspora muslims to fight each other unless governments work together to mitigate the threat at the core and the edge the middle east and its peripheral territories in asia and africa will suffer from terrorism and political violence in the foreseeable future the response to extremism and its vicious by product terrorism requires both preventive intelligence led and pre emptive community based security approaches while developing tactical counter terrorism capabilities governments should build strategic capabilities to erode their support bases the new frontiers in counter terrorism and extremism community engagement and rehabilitation should be integrated into government planning unless governments take the lead and work with community leaders societies will be threatened by the existing and emerging wave of ideologically motivated violence government and community leaders should develop whole of government and whole of nation approaches to dismantle transnational threats to contain isolate and eliminate the evolving threat the middle eastern states should shift from security cooperation to collaboration and partnership

Global Security, the Number One Dilemma of the World Community: the Case of the United States 2018-02-26 doctoral thesis dissertation from the year 2018 in the subject politics international politics topic peace and conflict studies security grade a atlantic international university course doctor of international relations with a major in international security language english abstract this paper is an attempt to deconstruct the concept of security which has been by tradition exclusively confined to the military realm we make evident that security takes into consideration a number of fields and that its major concern is the human person in addressing security in this work we do not only refer to the security of states the concept of national security but also to that of individuals human security governments should integrate in their security agendas not only their own security but also the security of their nationals accordingly this implies that they should protect their citizens against any threat to human life in other words governments or the people they rule do not merely face military threats from other states they are as well endangered by other threats to their security these threats are debated in this research paper we do not mean that military issues are not to be conceptualized within security frameworks but we do contend that they are not the unique issues to be securitized indeed this paper displays that other issues should be securitized
