Documentary Sources in Ancient

Near Eastern and Greco-Roman Economic History 2014-08-31

this volume breaks new ground in approaching the ancient economy by bringing together documentary sources from mesopotamia and the greco roman world addressing textual corpora that have traditionally been studied separately the collected papers overturn the conventional view of a fundamental divide between the economic institutions of these two regions the premise is that while controlling for differences texts from either cultural setting can be brought to bear on the other and can shed light through their use as proxy data on such questions as economic mentalities and market development the book also presents innovative approaches to the quantitative study of large corpora of ancient documents the resulting view of the ancient economy is much more variegated and dynamic than traditional 'primitivist' views would allow the volume covers the following topics babylonian house size data as an index of urban living standards the old babylonian archives as a source for economic history middle bronze age long distance trade in anatolia long term economic development in babylonia from the 7th to the 4th century bc legal institutions and agrarian change in the roman empire papyrological evidence for water lifting technology money circulation and monetization in late antique egypt the application of social network analysis to babylonian cuneiform archives price trends in the ancient near east and mediterranean in the hellenistic and roman periods as well as the effects of locust plagues on prices

in the english language world war i has largely been analysed and understood through the lens of the western front this book addresses this imbalance by examining the war in eastern and central europe the historiography of the war in the west has increasingly focused on the experience of ordinary soldiers and civilians the relationships between them and the impact of war at the time and subsequently this book takes up these themes and engaging with the approaches and conclusions of historians of the western front

examines wartime experiences and the memory of war in the east analysing soldiers letters and diaries to discover the nature and impact of displacement and refugee status on memory this volume offers a basis for comparison between experiences in these two areas it also provides material for intra regional comparisons that are still missing from the current research was the war in the east wholly other were soldiers in this region as alienated as those in the west did they see themselves as citizens and was there continuity between their pre war or civilian and military identities and if in the eastern context these identities were fundamentally challenged was it the experience of war itself or its consequences in the shape of imprisonment and displacement and changing borders that mattered most how did soldiers and citizens in this region experience and react to the traumas and upheavals of war and with what consequences for the post war era in seeking to answer these questions and others this volume significantly adds to our understanding of world war i as experienced in central and eastern europe

this english translation of the original russian work is thought provoking challenging the official version of what happened during world war ii firetrench the memory of the second world war on the eastern front still referred to in modern russia as the great patriotic war is an essential element of russian identity and history as alive today as it was in stalin s time it is represented as a defining episode a positive historical myth that sustains the russian national idea and unites the majority of russian citizens as a result as boris sokolov shows in this powerful and thought provoking study the heroic and tragic side of the war is highlighted while the dark side the incompetent negligent and even criminal way the war was run is overlooked although almost eighty years have passed since the defeat of nazi germany he

demonstrates that many of the fabrications put forward during the war and immediately afterwards persist into the present day in a sequence of incisive chapters he uncovers the truth about famous wartime episodes that have been consistently misrepresented his bold reinterpretation should go some way towards dispelling the enduring myths about the great patriotic war it is necessary reading for anyone who is keen to understand how it continues to be distorted in russia today

traditional model of the family the importance of the sovereign national state within globalization and the emphasis on a strong paternal state featuring hierarchy authority and political continuity the book concludes by analysing how far states in the region are experiencing a common trend and whether different countries conservative narratives are reinforcing each other or are colliding

this book is designed as a modest contribution to the ongoing deliberations about how to ease the fairly tight constraints on the external payments of many countries of the eastern part of europe in the first instance this inquiry is addressed to those that have embarked on wide ranging systemwide reforms external constraints have been markedly hampering the introduction of market oriented economic mutations thereby raising the cost of transition far above levels expected at the outset of the present wave of uniquely restructuring the countries involved i explore here several angles of this discussion but three stand out one is the disintegration of the postwar framework for economic cooperation in that part of the world another is the disarray brought about by incisive economic transformations in the area finally various national regional and international interest groups are at work there hoping to mold somehow the drift of the reform or at least key components thereof in their own image in the process it is often forgotten as ralf dahrendorf 1990 p 41 so pointedly remarked that a ll

Legislative Approximation and Application of EU Law in the Eastern Neighbourhood of the European Union 2014-02-24

regulatory reforms in the eu s eastern neighbourhood countries are not as sluggish as often perceived rule enforcement is happening despite the presence of domestic veto players who favour the status quo the lack of eu membership perspective and the presence of russia as an alternative governance provider using ukraine as a primary case study this book examines why convergence with transnational market rules varies across different policy sectors within the eastern neighbourhood countries it analyzes the drivers of regulatory change and explores the conditions under which post soviet economies integrate with international markets in doing so it argues that the impetus for regulatory change in the eastern neighbourhood lies in specific strategies of domestic empowerment applied by external actors furthermore through the study of the impact of western and russian transnational actors the book concludes that russia s presence does not necessarily hinder the integration of the eu s eastern neighbours with international markets instead russia both weakens and strengthens domestic support for convergence with transnational market rules in the region this book will be of key interest to students and scholars of european eu studies

and international relations especially in the areas of regulatory politics transnational governance public policy and post soviet transitions

a study of the british royal navy s activities in the indian ocean during world war ii led by admiral sir james somerville the story of the british eastern fleet which operated in the indian ocean against japan has rarely been told although it was the largest fleet deployed by the royal navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the second world war so charles stephenson s deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves british pre war naval planning for the far east is part of the story as is the disastrous loss of the battleship prince of wales and battlecruiser repulse in 1941 but the body of the book focuses on the new fleet commanded by admiral sir james somerville and its operations against the japanese navy and aircraft as well as japanese and german submarines later in the war once the fleet had been reinforced with an american aircraft carrier it was strong enough to take more aggressive actions against the japanese and these are described in vivid detail charles stephenson s authoritative study should appeal

to readers who have a special interest in the war with japan in naval history more generally and royal navy in particular praise for the eastern fleet and the indian ocean 1942 1944 this meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work the text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index this is not only a book for naval historians but also for anyone with an interest in the war in the indian ocean region highly recommended military historical society i enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of admiral somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the japanese dr john rickard author and webmaster of the military history encyclopedia on the
