math mammoth grade 3 a worktext light blue series is the student book for the first half of third grade math in this part a the main areas of study are addition and subtraction within 1 000 including mental math the concept of multiplication the multiplication tables telling time and working with time intervals counting coins and solving problems related to money features math mammoth focuses on conceptual understanding it explains the why so your children can understand the math not just learn how to do it concepts are often explained with visual models followed by exercises using those models these visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired the curriculum is mastery oriented this means it concentrates fairly long on a topic delving into its various aspects this promotes conceptual understanding as opposed to spiral curricula that often tend to jump from topic to topic too much there is a strong emphasis on mental math and number sense it requires very little teacher preparation which is a big help to most parents the curriculum has no separate teacher s manual nor is it scripted the introduction to each chapter has some notes for the teacher concerning the material in the chapter all the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see maria herself teach the material after each chapter introduction you will find a list of internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice for multiplication tables and division facts you can use our online practice program free this curriculum is essentially the same as the u s version of math mammoth grade 3 only customized for the canadian audience in these aspects the curriculum teaches the metric measurement units imperial units such as inches and pounds are not used the spelling conforms mostly to american english taking into account a few key differences where canadian english follows british english numbers are formatted with a space as a thousands separator and a point as a

decimal separator page paper size is letter
