while the u s constitution is brilliant do all of its 18th century notions make sense in a modern world specifically should the right to keep and bear arms apply to today s relentlessly violent society where mentally and emotionally disturbed individuals make headlines everyday by killing people in mass with high powered modernized weaponry in an objective way we explore the original application of the second amendment as well as how the united state s courts have defined it through the years the original constitution which 39 state delegates signed on september 17 1787 after a four month long constitutional convention made it clear that any newly formed federal government of the united state of america would have limited powers while the original constitution expressed the notion of limited power within the federal government it provided few specific rights and liberties for the people without these individual rights attached to the constitution many state delegates believed that a strong federal government could potentially abuse its citizens by denying them basic rights these delegates called anti federalists were led by virginia s patrick henry who did not sign the original constitution and demanded a bill of rights for the people refusing to support ratification of the document without amendments attached to it reluctantly the federalists led by virginia delegate james madison the father of the constitution being its primary writer and new york delegate alexander hamilton agreed to the amendments in order to complete ratification the federal government of the united states under the u s constitution began operation on march 4 1789 and on september 25 1789 the first congress adopted 12 amendments to the constitution in 1791 the states ratified 10 of those amendments sharing the second amendment of the 10 amendments are two ideas that the framers of the constitution constructed to align with one another although the specific reason for the alignment is not altogether clear in the eyes of many the ambiguity of their relationship to one another has created division in the years since ratification additionally the american populace has tested both ideas as separate entities through the years because of the amendments simple phrasing and lack of elaboration therefore interpretations of the amendment are vast and its place within the context of today s society adds to the complexity of the 27 words that make up amendment ii which read a well regulated militia being necessary to the security of a free state the right of the people to keep and bear arms shall not be infringed the second amendment amendment ii to the united states constitution

protects the right of the people to keep and bear arms and was adopted on december 15 1791 as part of the first ten amendments contained in the bill of rights the supreme court of the united states has ruled that the right belongs to individuals while also ruling that the right is not unlimited and does not prohibit all regulation of either firearms or similar devices state and local governments are limited to the same extent as the federal government from infringing this right per the incorporation of the bill of rights the second amendment was based partially on the right to keep and bear arms in english common law and was influenced by the english bill of rights of 1689 sir william blackstone described this right as an auxiliary right supporting the natural rights of self defense resistance to oppression and the civic duty to act in concert in defense of the state in the twenty first century the amendment has been subjected to renewed academic inquiry and judicial interest and debate between various organizations regarding gun control and gun rights is a daily part of american society

whether newly freed slaves could be trusted to own firearms was in great dispute in 1866 and the ramifications of this issue reverberate in today s gun control debate this is the only comprehensive study ever published on the intent of the framers of the fourteenth amendment and of reconstruction era civil rights

legislation to protect the right to keep and bear arms indeed this is the most detailed study ever published about the intent of the fourteenth amendment to incorporate and to protect from state violation any of the rights guaranteed by the bill of rights even including free speech paradoxically the second amendment is virtually the only bill of rights guarantee not recognized by the federal courts as protected by the fourteenth amendment through legislative and historical records generated during the reconstruction epoch 1866 1876 halbrook shows the intent of the fourteenth amendment and of civil rights legislation to guarantee full and equal rights to blacks including the right to keep and bear arms
