thought about before this book holds the reader's interest from start to finish. I look forward to his next book. Elizabeth Brown, president of SoftTech Inc., author Stephen Balzac has written a terrific book that gets into the realpolitik of organizational psychology, the underlying patterns of behavior that create the all-important company culture. He doesn't stop at the surface level explaining things we already know like culture beats strategy; he gets into the deeper drivers and ties everything back to specific actionable stories. For example, he describes different approaches to apparent insubordination by a manager rather than judging them; he shows how each management response is interpreted and how it then drives response. Balzac preaches real engagement with one's own company and a mindful state of operation, especially by executives who must remember that culture just happens unless and until they learn to recognize that their behaviors play a huge part in creating and cementing it. It covers the full spectrum of corporate life from challenging bad decisions to hiring, training, motivating teams, and the secrets of keeping people engaged and learning and/or avoiding actions which do the opposite. I highly recommend this book for anyone who wants to participate in creating and steering company culture. Sid Probst, chief technology officer at Active Intelligence, had the privilege of meeting Stephen Balzac at the 2011 International Computer Measurement Group (CMG) conference. He was one of our keynote speakers at the conference that year. His presentation was amazing; it was the first presentation I had seen at our conference in which the speaker not only gave a non-technical presentation that left the audience captivated and hungry for more, but he did it without using PowerPoint or other visuals and simply with the strength of the story and his oratory skills. As director of CMG Publications, I asked him to contribute some articles for our publications. He has been doing so now for two years and is one of our most popular authors. I was thrilled to learn Steve was having a book, *Organizational Psychology for Managers*, published and was honored when he asked me to read it and for my opinion. *Organizational Psychology for Managers* is phenomenal, just as his talks at conferences are captivating to his audience. Steve's book will captivate his readers. In my opinion, this book should be required reading in MBA programs, military leadership courses, and needs to be on the bookshelf of every Fortune 1000 VP of Human Resources. Steve Balzac is the 21st century's Tom Peters. Stephen R. Guendert, PhD, CMG Director of Publications.
