in this new anthology critiquing christianity john loftus a former minister and now a leading atheist has brought together an outstanding group of respected scholars who focus on the harms caused by the world s leading religion the contributors begin by dissecting the many problematic aspects of religious faith generally they

repeatedly demonstrate that with faith as a foundation almost anything can be believed or denied and almost any horrific deed can be committed the authors then take a good hard look at many of the most important political institutional scientific social and moral harms committed in the name of christianity these range from the historical persecutions of the inquisition and witch hunts to the current health hazards of faith healing finally the authors answer three common christian retorts to criticisms from nonbelievers 1 that atheists cannot judge a harmful action without an objective moral standard 2 that atheists need faith to solve the world s problems and 3 that atheists cannot live a good life without faith loftus and the contributors generally conclude that given both the well documented historical record and ongoing problems raised by the faith christianity decisively fails empirical tests of its usefulness to humanity

the idea that religion has a dangerous tendency to promote violence is part of the conventional wisdom of western societies and it underlies many of our institutions and policies from limits on the public role of religion to efforts to promote liberal democracy in the middle east william t cavanaugh challenges this conventional wisdom by examining how the twin categories of religion and the secular are constructed a growing body of scholarly work explores how the category religion has been constructed in the modern west and in colonial contexts according to specific configurations of political power cavanaugh draws on this scholarship to examine how timeless and transcultural categories of religion and the secular are used in arguments that religion causes violence he argues three points 1 there is no transhistorical and transcultural essence of religion what counts as religious or secular in any given context is a function of political configurations of power 2 such a transhistorical and transcultural concept of religion as non rational and prone to violence is one of the foundational legitimating myths of western society 3 this myth can be and is used to legitimate neo colonial violence against non western others particularly the muslim world

this work supports the proposition that the eradication of religion will make us live as one and there is only one way to remove religion and that is to remove the need for it armed only with reason this work will prove that due to ignorance religion is just an invention to fill a need this work has three segments the first explores from the point of view of a christian practicing pagan the process on how myth became reality it will prove that god was invented and re invented perpetually for necessity and convenience it is that need that gave the bible its religious relevance understood with a naked mind the bible is far from being just a religious document but a political one this work explores why religion and politics cannot and will not separate hence unavoidably it dipped its hands into one painful political issue the israeli palestinian conflict the second part elucidates that if the foundation is a myth it only follows that what was founded on it jesus is a lie it will give proof to the fact that the new testament was manipulated to further vested interest understood with an unconditioned mind that is without the traditional spirituality attached to it it will

prove that jesus is just selfishly scheming to regain his grandfather david s throne it will also prove that jesus is gay the last part is my way of introducing buddhism it could shed light to what western science is exiting themselves about it answers why man will never find the missing link it explains how and why advanced civilizations deteriorated to their present state in our fight against virus causing disease we must explore all avenues to defeat it buddhism offers one buddhism is not only about science it is also about religion it delves into the reality of a soul buddhism gives us reason on why we must discriminate on account of race or for any other reason

the aim of religion and violence is to engage dialectically key symbols of religiously motivated violence through the insights of bernard lonergan sociologists and psychologists argue the link between religion and violence religion is viewed more as part of the problem and not part of the solution to violence bernard lonergan s insights have helped the author arrive at a number of conclusions regarding the link between religion and violence he argues that there is a difference between distorted religion and genuine religion between authenticity and inauthenticity of the subject distorted religion has the capacity to shape traditions in ways that justify violence while genuine religion heals persons helps them make different moral decisions when confronted with situations of conflict and aims to explore new ways of understanding themselves as shaping history toward progress further religion and violence while arguing from within the catholic christian tradition nevertheless seeks to provide a number of categories that will speak to people from other cultural traditions since many of the examples of religious violence cited by commentators come out of the islamic tradition the author has evidenced and explored more authentic aspects of the islamic tradition that would help provide a solution to violence

## Human Identity at the Intersection of Science, Technology and Religion 2016-05-13

religion evokes strong emotions and raises hard questions this volume addresses many of the contentious elements that religion provokes and challenges some of the easy answers contemporary society has produced the frequent and often facile dictum about the separation of church and state when examined closely may prove to contribute to the erosion of some of our most cherished human values rather than to their preservation the science versus religion dichotomy is dogma for many yet the empiricism that is the hallmark of scientific method and knowledge can be singularly absent from positions that claim to be science the current spate of attacks against god and religion that are now commonplace when critically scrutinized often fail to provide compelling arguments or even to be as objective as their authors claim these and other explorations are the focus of this book from the forward in which charles kimball challenges the west to re evaluate its perspective and

understanding of the east particularly islam to the afterword in which theologian gregory baum chronicles the extraordinary reversal of sociology's estimation of religion the invitation from this volume to all of us is to review our pieties and presuppositions as we reflect on the future of religion
