Computer User's Guide 1987 many of us in the it profession seem to have very few problems with our own personal computers and laptops yet our clients seem to get a dizzying assortment of computer errors and issues what is the difference between our computers and the computer our clients use as a colleague once said computers don't break themselves people do it are you treating your computer with the respect it deserves do you fear your computer because you don't understand how it works are you not sure what is the best way to use your computer and how to not lose any of your data this book will help you know more about the technology and goes into making your personal computer work maybe more than you ever wanted to know but knowledge is power and you are the master of your pc

NBS Computer User's Guide 1975 computers ibm

AFPS Hand Held Computer User Guide 1990 the first volume in an exclusive publishing venture between ibm and mcgraw hill this book offers both engineers and advanced pc users an inside look at how to make the best and most productive use of their pcs and currently available software written in simple nontechnical language it offers tips hints and do's and don'ts for avoiding and coping with technical snares when changing hardware and software

The Original Computer Idiot PC Users Guide 1992-10-01 you probably suspect on some level that computers might be hazardous to your health you might vaguely remember a study that you read years ago about miscarriages being more frequent for data entry operators or you might have run into a co worker wearing splints and talking ominously about workers comp insurance or you might notice that when you use a computer too long you get stiff and your eyes get dry but who wants to worry about such things surely the people wearing splints must be malingerers who don't want to work surely the people who design keyboards and terminals must be working to change their products if they are unsafe surely so long as you're a good worker and keep your mind on your job nothing bad will happen to you the bad news is you can be hurt by working at a computer the good news is that many of the same factors that pose a risk to you are within your own control you can take action on your own to promote your own health whether or not your terminal manufacturer keyboard designer medical provider safety trainer and boss are working diligently to protect you the computer user's survival guide looks squarely at all the factors that affect your health on the job including positioning equipment work habits lighting stress radiation and general health through this guide you will learn a continuum of neutral postures that you can utilize at different work tasks how radiation drops off with distance and what electrical equipment is responsible for most exposure how modern office lighting is better suited to working on paper than on a screen and what you can do to prevent glare simple breathing techniques and stretches to keep your body well oxygenated and relaxed even when you sit all day how reading from a screen puts unique strains on your eyes and what kind of vision breaks will keep you most productive and rested what's going on under the skin when your hands and arms spend much of the day mousing and typing and how you can apply that knowledge to prevent overuse injuries the computer user's survival guide is not a book of gloom and doom it is a guide to protecting yourself against health risks from your computer while boosting your effectiveness and your enjoyment of work
