Graphic Showbiz 2014-02-20 kenneth straus weaves together many threads in russian social history to develop a new theory of working class formation in the years of stalin s first five year plan in so doing he addresses a long standing debate among historians by suggesting new answers to an old question was there social support for the stalin regime among the soviet working class during the 1930s and if so why straus argues that the keys for interpreting stalinism lie in occupational specialization on the one hand and community organization on the other he focuses on the daily life of the new soviet workers in the factory and community arguing that the most significant new trends saw peasants becoming open hearth steel workers housewives becoming auto assembly line workers and machine operatives and youth training en masse rather than occupations categories in the vocational schools in the factories the fzu tapping archival material only recently available and a wealth of published sources straus presents soviet social history within a new analytical framework suggesting that stalinist forced industrialization and soviet proletarianization is best understood within a comparative european framework in which the theories of marx durkheim and weber best elucidate both the broad similarities with western trends and the striking exceptional aspects of the soviet experience

Moon Grand European Journeys 2021-09-29 this edited volume examines mobile phone use in china unlike most studies on ict development in china this book argues for the importance of the cultural realm as captured in mobile phone usage in reflecting the normative basis and struggle of the people it stresses how the mobile phone is in fact an important means by which one can understand a rapidly changing china a key concern of the book is to assert the uniqueness of china s experience in mobile phone usage this uniqueness is encapsulated by the phrase riding the double juggernaut in that chinese society is exposed to a rapid process of industrialization and cyberization in a short period of time the contributors maintain that such density of experience under a compressed period when the society has a thick cultural heritage of its own and yet is still under a dictating rule all come together to provide a unique situation in china

Mac Fan 2021 11 2022-11-11 this book presents and discusses alternatives to ordinary transmission lines for the design and implementation of advanced rf microwave components in planar technology this book is devoted to the analysis study and applications of artificial transmission lines mostly implemented by means of a host line conveniently modified e g with modulation of transverse dimensions with etched patterns in the metallic layers etc or with reactive loading in order to achieve novel device functionalities superior performance and or reduced size the author begins with an introductory chapter dedicated to the fundamentals of planar transmission lines chapter 2 is focused on artificial transmission lines based on periodic structures including non uniform transmission lines and reactively loaded lines and provides a comprehensive analysis of the coupled mode theory chapters 3 and 4 are dedicated to artificial transmission lines inspired by metamaterials or based on metamaterial concepts these chapters include the main practical implementations of such lines and their circuit models and a wide overview of their rf microwave applications including passive and active circuits and antennas chapter 5 focuses on reconfigurable devices based on tunable artificial lines and on non linear transmission lines the chapter also introduces several materials and components to achieve tuning including diode varactors rf mems ferroelectrics and liquid crystals finally chapter 6 covers other advanced transmission lines and wave guiding structures such as electroinductive magnetoinductive wave lines common mode suppressed balanced lines lattice network artificial lines and substrate integrated waveguides artificial transmission lines for rf and microwave applications provides an in depth analysis and discussion of artificial transmission lines including design guidelines that can be useful to researchers engineers and students

**Mobile Communication and Greater China** 2015-07-01 smart nanoparticles for biomedicine explores smart nanoparticles that change their structural or functional properties in response to specific external stimuli electric or magnetic fields electromagnetic radiation ultrasound etc particular attention is given to multifunctional nanostructured materials that are pharmacologically active and that can be actuated by virtue of their magnetic dielectric optically active redox active or piezoelectric properties this important reference resource will be of great value to readers who want to learn more on how smart nanoparticles can be used to create more effective treatment solutions nanotechnology has enabled unprecedented control of the interactions between materials and biological entities from the microscale to the molecular level nanosurfaces and nanostructures have been used to mimic or interact with biological microenvironments to support specific biological functions such as cell adhesion mobility and differentiation and in tissue healing recently a new paradigm has been proposed for nanomedicine to exploit the intrinsic properties of nanomaterials as active devices rather than as passive structural units or carriers for medications discusses the synthesis characterization and applications of a new generation of smart nanoparticles for nanomedicine applications explores the problems relating to the biocompatibility of a range of nanoparticles outlining potential solutions describes techniques for manipulating specific classes of nanoparticles for a variety of treatment types

**Artificial Transmission Lines for RF and Microwave Applications** 2017-11-30 gender discrimination pervades nearly all legal institutions and practices in latin america the deeper question is how this shapes broader relations of power by examining the relationship between law and gender as it manifests itself in the mexican legal system the thirteen essays in this volume show how law is produced by but also perpetuates unequal power relations at the same time however authors show how law is often malleable and can provide spaces for negotiation and redress the contributors including political scientists sociologists geographers anthropologists and economists explore these issues not only in courts police stations and prisons but also in rural organizations indigenous communities and families by bringing new interdisciplinary perspectives to issues such as the quality of citizenship and the rule of law in present day mexico this book raises important issues for research on the relationship between law and gender more widely
