world literature was long defined in north america as an established canon of european masterpieces but an emerging global perspective has challenged both this european focus and the very category of the masterpiece the first book to look broadly at the contemporary scope and purposes of world literature what is world literature probes the uses and abuses of world literature in a rapidly changing world in case studies ranging from the sumerians to the aztecs and from medieval mysticism to postmodern metafiction david damrosch looks at the ways works change as they move from national to global contexts presenting world literature not as a canon of texts but as a mode of circulation and of reading damrosch argues that world literature is work that gains in translation when it is effectively presented a work of world literature moves into an elliptical space created between the source and receiving cultures shaped by both but circumscribed by neither alone established classics and new discoveries alike participate in this mode of circulation but they can be seriously mishandled in the process from the rediscovered epic of gilgamesh in the nineteenth century to rigoberta menchú s writing today foreign works have often been distorted by the immediate needs of their own editors and translators eloquently written argued largely by example and replete with insightful close readings this book is both an essay in definition and a series of cautionary tales

# **The Idea of World Literature**

## **2006-04-15**

johann wolfgang von goethe introduced the concept of weltliteratur in 1827 to describe the growing availability of texts from other nations although the term world literature is widely used today there is little agreement on what it means and even less awareness of its evolution in this wide ranging work john pizer traces the concept of weltliteratur in germany beginning with goethe and continuing through heinrich heine karl marx and friedrich engels to the present as he explores its importation into the united states in the 1830s and the teaching of world literature in u s classrooms since the early twentieth century pizer demonstrates the

concept's ongoing viability through an in-depth reading of the contemporary Syrian German transnational novelist Rafik Schami. He also provides a clear methodology for world literature courses in the twenty-first century. Pizer argues persuasively that Weltliteratur can provide cohesion to the study of world literature today. In his view, traditional world lit classes are limited by their focus on the universal elements of literature. A course based on Weltliteratur, however, promotes a more thorough understanding of literature as a dialectic between the universal and the particular. In a practical guide to teaching world literature by employing Goethe's paradigm, he explains how to help students navigate between the extremes of homogenization on the one hand and exoticism on the other. Learning both what cultures share and what distinguishes them, everyone who teaches world literature will want to read this stimulating book. In addition, anyone interested in the development of the concept from its German roots to its American fruition will find the idea of world literature immensely rewarding.

excerpt from world literature and its place in general  
culture this book presents a conception of world literature  
not in the sense of the sum total of particular literatures but  
as a unity the literary field seen in perspective from the  
point of view of the english speaking peoples theoretical  
treatment is throughout supplemented by exposition of  
masterpieces to the general reader the book suggests a  
rational scheme of connection such as should be at the back  
of every attempt to make choice of the best books for the  
student it illustrates a treatment of the subject unhampered  
by divisions between particular literatures in different  
languages divisions which make the weakness of literary  
study in our academic systems its plea is that such world  
literature belongs to every st of general culture from the  
most elementary to the most advanced my life has been  
entirely occupied with the study and the teaching of  
literature i have sought in the present work to embody the  
main results of my experience so far as these bear upon the

v s naipaul is a major and controversial figure in postcolonial and world literature this book provides a challenging and uncompromisingly honest study that engages with history genre theory aesthetics and global literary culture with close reference to naipaul s published and archival material in his fiction and creative histories the definition of the modern idea of world literature is informed by the importance of an artistic ordering of perception although often expressing ideas that are prejudicial and morally repugnant there is an honesty in his writings where one finds extraordinary insights into how life is experienced within colonial structures of power these colonial structures provided no abstract unity to the field of literary expression

and ignored vernacular cultures the book argues that a universal ideology of the aesthetic transcending time regions and languages provides world literature with a unity which is possible only within a critical universal humanism attuned to heroic readings of texts and cultures

this book reads representations of western music in literary texts to reveal the ways in which artifacts of imperial culture function within contemporary world literature bushnell argues that western music s conventions for performance composition and listening established during the colonial period persist in postcolonial thought and practice music from the baroque classical and romantic periods bach through brahms coincides with the rise of colonialism and western music contains imperial attitudes and values embedded within its conventions standards and rules the book focuses on the culture of classical music as reflected in the worlds of characters and texts and contends that its effects outlast the historical significance of the real composers pieces styles and forms through examples by authors such as mcewan vikram seth bernard maclaverty

chang rae lee and j m coetzee the book demonstrates how western music enters narrative as both acts of history and as structures of analogy that suggest subject positions human relations and political activity that in turn describes a postcolonial condition the uses to which western music is put in each literary text reveals how european art music of the seventeenth through the nineteenth centuries is read and misread by postcolonial generations exposing mostly hidden cultural structures that influence our contemporary understandings of social relations and hierarchies norms for resolution and for assigning significance and standards of propriety the book presents strategies for thinking anew about the persistence of cultural imperialism reading western music simultaneously as representative of imperial cultural dominance and as suggestive of resistant structures forms and practices that challenge the imperial hegemony
