book 2 student testimonials this is the best way to learn math
summit math books are unlike typical textbooks it doesn't matter
how you learn or what speed you go at you can learn at your own
pace while still understanding all the material summit math
books have guided me through algebra they are the stepping
stones of what it takes to think like a mathematician i really
enjoy learning from these books they clearly demonstrate how
concepts are built over other concepts you don't just memorize
you actually understand it parent testimonials summit math
books not only helped my daughter learn the math they helped
her to love learning math in and of itself summit math books
have a fun self-paced way to explain math concepts i am
absolutely thrilled with this math program the books are so well
organized and the content builds from one lesson to the next we
are really impressed and grateful for our boys' understanding of
what the math means not just how to get problems right we
should all learn to understand math this way as the mother of a
teenage daughter who previously had occasional difficulty in
math it was refreshing to watch her actually enjoy her math class
and to understand the subject matter without struggling i have
three kids that have used summit math using these books they
have more freedom to learn and explore at their own pace during
class with notes already incorporated within the book teacher
testimonials summit math allows students to work at their own
pace which allows me the opportunity to provide individualized
attention to those who need it summit math emphasizes
understanding concepts rather than memorizing rules students
take ownership while acquiring the necessary skills to solve
meaningful math problems it has been a real benefit having
problem sets that are explicitly designed to guide students
through the development of their understanding of the how and
why behind the concepts they are studying see more testimonials
