first full length study of demetrius of alexandria 189 232 ce who generated a neglected yet remarkable hagiographic program that secured him a positive legacy throughout the middle ages and the modern era drawing upon patristic coptic and arabic sources spanning a millennium the analysis contextualizes the demetrian corpus at its various stages of composition and presents the totality of his hagiographic corpus in translation this volume constitutes a definitive study of demetrius but more broadly it provides a clearly delineated hagiographic program and charts its evolution against a backdrop of political developments and intercommunal interactions this fascinating study is a useful resource for students of demetrius and the church in egypt in this period but also for anyone working on early christianity and hagiography
