discusses values from the perspective of different health care professionals and why teams and collaborations may succeed or fail reflecting the increased importance of the collaborations between radiation oncology and informatics professionals informatics in radiation oncology discusses the benefits of applying informatics principles to the processes within radiotherapy it explores how treatment and imaging information is represented stored and retrieved as well as how this information relates to other patient data the book deepens your knowledge of current and emerging information technology and informatics principles applied to radiation oncology so that all the data gathered from laboratory results to medical images can be fully exploited to make treatments more effective and processes more efficient after introducing the basics of informatics and its connection to radiation oncology the book examines the process of healthcare delivery in radiation oncology the challenges of managing images in radiotherapy and the burgeoning field of radiogenomics it then presents teaching clinical trials and research tools and describes open access clinical imaging archives in radiotherapy techniques for maximizing information from multimodality imaging and the roles of images in treatment planning it also looks at how informatics can improve treatment planning the safety and efficiency of delivery systems image guided patient positioning and patient assessment the book concludes with discussions on how outcomes modeling evaluates the effectiveness of treatments how quality control informatics improves the reliability of processes and how to perform quality assurance on the informatics tools with contributions from a host of top international experts in radiation what they wish they had learned in law school advice on balancing work and personal life commitments and insider tips on what it takes to succeed as an attorney this series in computers and medicine had its origins when i met jerry stone of springer verlag at a scamc meeting in 1982 we determined that there was a need for good collections of papers that would help disseminate the results of research and application in this field i had already decided to do what is now information systems for patient care and jerry contributed the idea of making it part of a series in 1984 the first book was published and thanks to jerry s efforts computers and medicine was underway since that time there have been many changes sadly jerry died at a very early age and cannot share in the success of the series that he helped found on the bright side however many of the early goals of the series have been met as the result of equipment improvements and the consequent lowering of costs com puters are being used in a growing number of medical applications and the health care community is very computer literate thus the focus of concern has turned from learning about the technology to understanding how that technology can be exploited in a medical environment in 2001 afihm and the british hci group combined their annual conferences bringing together the best features of each organisation s separate conference series and providing a special opportunity for the french and english speaking hci communities to interact this volume contains the full papers presented at ihm hci 2001 the 15th annual conference of the british hci group a specialist group of the british computer society and the 14th annual conference of the association francophone d interaction homme machine an independent association for any french speaking person who is interested in human computer interaction human computer interaction is a discipline well suited to such a multi linguistic and multi cultural conference since it brings together researchers and practitioners from a variety of disciplines with very different ways of thinking and working as a community we are already used to tackling the challenges of working across such boundaries dealing with the problems and taking advantage of the richness of the resulting insights interaction without frontiers the papers presented in this volume cover all the main areas of hci research but also focus on considering the challenges of new applications addressing the following themes enriching hci by crossing national linguistic and cultural boundaries achieving greater co operation between disciplines to deliver usable useful and exciting design solutions benefiting from experience gained in other application areas transcending interaction constraints through the use of novel technologies supporting mobile users offers a comprehensive guide to medical aspects covers important classic and newer topics presents a practical and manageable level of detail medical informatics and electronic healthcare have many benefits to offer in terms of quality of life for patients healthcare personnel citizens and society in general but evidence based medicine needs quality information if it is to lead to quality of health and thus to quality of life this book presents the full papers accepted for presentation at the mie2012 conference held in pisa italy in august 2012 the theme of the 2012 conference is quality of life through quality of information as always the conference provides a unique platform for the exchange of ideas and experiences among the actors and stakeholders of ict supported healthcare the book incorporates contributions related to the latest achievements in biomedical and health informatics in terms of major challenges such as interoperability collaboration coordination and patient oriented healthcare at the most appropriate level of care it also offers new perspectives for the future of biomedical and health informatics critical appraisal of strategies for user involvement insights for design deployment and the sustainable use of electronic health records standards social software citizen centred e health and new challenges in rehabilitation and social care informatics the topics presented are interdisciplinary in nature and will be of interest to a variety of professionals physicians nurses and other allied health providers health informaticians engineers academics and representatives from industry and consultancy in the various fields this book provides a view of the possibilities and challenges facing online educators and evaluators in the 21st century provided by publisher master all the animal care duties of a veterinary technician mccurnin s clinical textbook management education standards consumer health and human factors emerging technologies sustainability organizational and economic issues genomics and image and signal processing as this volume carries such a wide collection it will be of great interest to anyone engaged in biomedical and health informatics research and application managing clinical processes is the first book of its kind to address the concept of clinical process management and to integrate the clinical workplace within the corporate organisation for the Australian health services industry it provides clinicians and managers with an understanding of the demands and expectations of modern health services from a patient consumer and multidisciplinary perspective and how to manage them the text offers an evidence based approach to organising evaluating and revising the processes that constitute a health service based on systematising care processes for specific clinical case types managing clinical processes in health services will be invaluable to those integrating and improving systems of clinical process management across the organisation provided by publisher today's non Tayloristic work environments call for flexible work practices supported by dynamic IT systems changing and optimising business processes has become an important adaptation mechanism in this context however process models cannot capture every conceivable real life situation and firms software infrastructures often do not provide the flexibility required for supporting design in use through effective tailoring processes the involvement of business users in the continuous redesign of business processes is a beneficial solution for these problems as it enhances decision processes by making specific information available more quickly however involving business users in these redesign processes requires specific design tools this book presents the development of an environment that enables business users to independently model business processes and workflows the environment reduces the technical skills required for modelling business processes and workflows to enable business users to tailor heterogeneous software infrastructures it also provides improved documentation facilities the facilities add usage related information about services to the existing functional metadata which is already included in current service standards and workflow modelling tools the environment enables business users to create this usage related information cooperatively which leads to a domain specific documentation of services based on this information it provides an enhanced search system that identifies related services and service functions the evaluation of the environment showed that users had a positive perception of modelling business processes and workflows they considered this to be useful for the visualisation and automation of business processes as well as for the creation of calculations since it could enhance the efficiency and efficacy of their work this multi volume book delves into the many applications of information technology ranging from digitizing patient records to high performance computing to medical imaging and diagnostic technologies and much more this book examines current developments and challenges in the incorporation of ICT in the health system from the vantage point of patients providers and researchers the authors take an objective realistic view of the shift that will result for patients providers and the healthcare industry in general from the increased use of ehealth services provided by publisher unequal distribution of wealth poverty pollution and gender inequality are just a few of the problems we face and struggle to eliminate sustainable development offers a long term holistic solution to these problems through meeting the needs of the current generation without endangering the capability of future generations in meeting their own needs sustainable education or education for sustainability is a transformative learning paradigm that prepares learners and provides them with knowledge ethical awareness skills values and attitudes to achieve sustainable goals global approaches to sustainability through learning and education is a comprehensive academic publication that facilitates a greater understanding of sustainable development and fosters a culture of sustainability through learning and education highlighting a range of topics such as ethics game based learning and knowledge management this book is ideal for teachers environmentalists higher education faculty activists curriculum developers academicians researchers professionals administrators and policymakers this multiple volume publication advances the emergent field of mobile computing offering research on approaches observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers provided by publisher in the twenty first century learning and the definition of education is changing new digital online and social tools have the ability to transform the classroom and engage learners like never before in the midst of this technological revolution it is crucial for educators and administrators to be able to gauge the impact of digital tools on learners in a variety of settings measuring and analyzing informal learning in the digital age addresses the need for educators administrators and professionals across industries to be more attentive to the learning process outside of a traditional classroom

setting as online learning and moocs in particular become more mainstream tracking informal learning becomes difficult despite the necessity of feedback and measurement in non formal learning environments investigating some of the primary technologies being used in educational settings and how a less structured and more open learning environment can effectively motivate students and non traditional learners this premier reference is a crucial source of information for educators administrators theorists and other professionals in the field of education this book constitutes the refereed proceedings of the 11th international conference on persuasive technology persuasive 2016 held in salzburg austria in april 2016 the 27 revised full papers and 3 revised short papers presented were carefully reviewed and selected from 73 submissions the papers are grouped in topical sections on individual differences theoretical reflections prevention and motivation methods and models games and gamification interventions for behavior change and design strategies and techniques socially excluded youth with mental health problems and co occurring difficulties e g conduct disorder family breakdown homelessness substance use exploitation educational failure attract the involvement of multiple agencies poorly coordinated interventions often multiply in the face of such problems so that a young person or family is approached by multiple workers from different agencies working towards different goals and using different treatment models these are often overwhelming and may actually be experienced as aversive by the young person or their family failure to provide effective help is costly throughout life this is the first book to describe adaptive mentalization based integrative treatment ambit this is an approach to working with people particularly young people and young adults whose lives are often chaotic and risky and whose problems are not limited to one domain in addition to mental health problems they may have problems with care arrangements education or employment exploitation substance misuse offending behaviours and gang affiliations if these problems are all occurring simultaneously any progress in one area is easily undermined by harms still occurring in another ambit has been designed by and for community teams from mental health social care youth work or that may be purposefully multi disciplinary multi agency it emphasises the need to strengthen integration in the complex networks that tend to gather around such clients minimising the likelihood of an experience of care that is aversive ambit uses well evidenced mentalization based approaches that are at their core integrative drawing on recent advances in neuroscience psycho analytic social cognitive and systemic treatment models

this series in computers and medicine had its origins when i met jerry stone of springer verlag at a scamc meeting in 1982 we determined that there was a need for good collections of papers that would help disseminate the results of research and application in this field i had already decided to do what is now information systems for patient care and jerry contributed the idea of making it part of a series in 1984 the first book was published and thanks to jerry s efforts computers and medicine was underway since that time there have been many changes sadly jerry died at a very early age and cannot share in the success of the series that he helped found on the bright side however many of the early goals of the series have been met as the result of equipment improvements and the consequent lowering of costs computers are being used in a growing number of medical applications and the health care community is very computer literate thus the focus of concern has turned from learning about the technology to understanding how that technology can be exploited in a medical environment

today s non tayloristic work environments call for flexible work practices supported by dynamic it systems changing and optimising business processes has become an important adaptation mechanism in this context however process models cannot capture every conceivable real life situation and firms software infrastructures often do not provide the flexibility required for supporting design in use through effective tailoring processes the involvement of business users in the continuous redesign of business processes is a beneficial solution for these problems as it enhances decision processes by making specific information available more quickly however involving business users in these redesign processes requires specific design tools this book presents the development of an environment that enables business users to independently model business processes and workflows the environment reduces the technical skills required for modelling business processes and workflows to enable business users to tailor heterogeneous software infrastructures it also provides improved documentation facilities the facilities add usage related information about services to the existing functional metadata which is already included in current service standards and workflow modelling tools the environment enables business users to create this usage related information cooperatively which leads to a domain

specific documentation of services based on this information it provides an enhanced search system that identifies related services and service functions the evaluation of the environment showed that users had a positive perception of modelling business processes and workflows they considered this to be useful for the visualisation and automation of business processes as well as for the creation of calculations since it could enhance the efficiency and efficacy of their work
