The region of the great plains. The great forest region of the temperate zone. The arctic or polar zone. The region of the great mountain ranges. The great river systems 1897 the practice of comparing languages has a long tradition characterized by a cyclic pattern of interest its meeting with corpus linguistics in the 1990s has led to a new sub discipline of corpus based contrastive studies the present volume tackles two main challenges that had not yet been fully addressed in the literature namely an empirical assessment of the nature of the data commonly used in cross linguistic studies e g translation data versus comparable data and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings the papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels in sum this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research within this field

*Durability of Concrete* 2017-06-26 this encyclopedia of land use land cover and soil sciences is a component of the global encyclopedia of life support systems eolss which is an integrated compendium of twenty one encyclopedias land is one of our most precious assets it represents space provides food and shelter stores and filters water and it is a base for urban and industrial development road construction leisure and many other social activities land is however not unlimited in extent and even when it is physically available its use is not necessarily free either because of natural limitations too cold too steep too wet or too dry etc or because of constraints of access or land tenure this 7 volume set contains several chapters each of size 5000 30000 words with perspectives applications and extensive illustrations it carries state of the art knowledge in the fields of land use land cover and soil sciences and is aimed by virtue of the several applications at the following five major target audiences university and college students educators professional practitioners research personnel and policy analysts managers and decision makers and ngos
