this is a 3 book bundle which addresses various subtopics including but not limited to these book 1 many people don't understand what critical thinking is moreover not all the ones that do apply it in their daily lives politics the media and so many other aspects of society show how small the number is of people who use their brains critical thinking means among others that you look at multiple sides of a controversial topic that you can stay objective and put away your biases until you have reached a firm conclusion based on verifiable facts this skill is highly valuable in job interviews relationships and everyday life in order to improve your critical thinking skills it would be best to adopt the best practices that help you accomplish this task in other words some things help you develop this skill others are a waste of time and effort or even worse go against it and cause a degeneration of your intellect and open minded attitude book 2 what makes someone a critical thinker the attributes of such a person are elaborately described in this book alongside with that the book highlights the many benefits of critical thinking an often neglected brain skills society needs to improve on however most of the book is focused on relevant and irrelevant reasoning so often we attribute certain consequences to the wrong causes we jump to conclusions based on limited information emotions or generalizations this book will clear all that up by giving you new insights to determine what is relevant and what is not book 3 what is a fallacy many people may have heard the word before but don't grasp the magnitude of it they erroneously assume that they aren't guilty of embracing half truths or false conclusions and yet those are often the ones who do it the most in this guide you will receive greater comprehension of what fallacies are and close your blind spot to the truth of things later the author goes on to instruct you on inductive and deductive reasoning which are two techniques that help people reach logical conclusions without going astray in their paths of thinking last but not least a long chapter is devoted to developing moral character our conscience and our ethics everything can be justified but to live with our conscience is an art by itself
