Advances in Economics and Econometrics: Volume 1 1967 this book explores family economic decision making in the united states from the nineteenth century through present day specifically looking at the relationship between family resource allocation decisions and government policy it examines how families have responded to incentives and constraints established by diverse federal and state policies and laws including the regulation of marriage and of female labor force participation child labor and education policies including segregation social welfare programs and more the goal of this book is to present family economic decisions throughout us history in a way that contextualizes where the us economy and the families that drive it have been it goes on to discuss the role public policies have played in that journey where we need to go from here and how public policies can help us get there at a time when american families are more complex than ever before this volume will educate readers on the often unrecognized role that government policies have on our family lives and the uncelebrated role that family economic decision making has on the future of the us economy

Economic Education 1949 with global demand for energy poised to increase by more than half in the next three decades the supply of safe reliable and reasonably priced gas and oil will continue to be of fundamental importance to modern economies central to this supply are the pipelines that transport this energy and while the fundamental economics of the major pipeline networks are the same the differences in their ownership commercial development and operation can provide insight into the workings of market institutions in various nations drawing on a century of the world's experience with gas and oil pipelines this book illustrates the importance of economics in explaining the evolution of pipeline politics in various countries it demonstrates that institutional differences influence ownership and regulation while rents and consumer pricing depend on the size and diversity of existing markets the depth of regulatory institutions and the historical structure of the pipeline businesses themselves the history of pipelines is also rife with social conflict and makholm explains how and when institutions in a variety of countries have controlled pipeline behavior either through economic regulation or government ownership in the public interest
