women have historically been prevented from living autonomously by systematic injustice subordination and oppression the lingering effects of these practices have prompted many feminists to view autonomy with suspicion here marilyn friedman defends the ideal of feminist autonomy in her eyes behavior is autonomous if it accords with the wants cares values or commitments that the actor has reaffirmed and is able to sustain in the face of opposition by her account autonomy is socially grounded yet also individualizing and sometimes socially disruptive qualities that can be ultimately advantageous for women friedman applies the concept of autonomy

to domains of special interest to women she defends the importance of autonomy in romantic love considers how social institutions should respond to women who choose to remain in abusive relationships and argues that liberal societies should tolerate minority cultural practices that violate women s rights so long as the women in question have chosen autonomously to live according to those practices
